## INTRODUCTION

This release notes document describes VIRTU MVP 2.0 Desktop Edition software version 3.0.108 for Microsoft Windows 7, Microsoft Windows 8 and Microsoft Windows 8.1. The document describes features and known issues in this software version.

## General Notes

- **NOTE!**  
**This MVP 2.0 version is provided “AS IS”, and under the terms and conditions of the End User License Agreement provided therewith.**
- Internet connection is required for the product license activation
- For evaluation purposes, in case no Lucid products were installed on this system earlier this version can be used on non-licensed systems for no longer than 30 days.

## In this version

- Add support for Microsoft Windows 8.1
- Fixed Black screen on Windows 8.1
- Fixed Windows 8.1 Secure boot issue
- Fixed crash after installing AMD drivers v13.1
- Added 3DMark benchmark
- Fixed Handbrake Video Encoder Issues
- Fixed - Lucid SVC is not running correctly
- General stability and bugs fixes

## Known issues and restrictions in this driver version

The following are known issues with current driver release:

- *Trend antivirus* is blocking MVP 2.0 installation
- Windows Guest Mode issues with 3DMark06 and 3DMarkVantage – cannot disable MVP 2.0
- Switching between i-Mode and d-Mode might result in a black screen – this is not related to MVP software, it happens in native also
- 3DMark06 default settings may show no performance gain with HyperFormance feature, due to high CPU load of the application – will not be fixed
- Some games may show random minor artifacts
- When setting HyperFormance "on" sometimes performance may not improve
- GUI may exhibit artifacts on Windows 7 32-bit edition
- Configurations with more than one discrete GPU are not supported
- The application will crash if installed in a path with a total length of less than 12 characters (e.g. "C:\Short")
