About DRAGON CENTER

- Optimize game settings and enjoy a high quality gaming experience.
- System performance tuning, you can choose overclock or silent.
- Monitor system information.
- Adjust the color of the screen display and enjoy better visual effects.
- Register your MSI products.
- Control the LED light effects and synchronize effects of your devices.
- Manage network connection settings.
- Use utilities to control special features.

⚠ Important

THE SOFTWARE FEATURES IN THIS USER GUIDE VARY BY PRODUCT.

THE SCREENSHOTS FOR THE UI IN THIS USER GUIDE ARE FOR REFERENCE ONLY AND THE ACTUAL UI DESIGN MAY VARY.
Get Started

System Requirements
• Operating System:
  ▪ Windows 10 64-bit

Supported Hardware
• Motherboard:
  ▪ MSI motherboards
• Graphics card:
  ▪ MSI GeForce RTX 20 & GTX 16 Series graphics cards or newer

Installing DRAGON CENTER
1. Go to MSI Website download DRAGON CENTER.
2. Extract the downloaded file.
3. Double-click on the extracted Dragon Center setup program.
4. Click Install to continue the process.
5. Select the Start button, then select Dragon Center.
6. Click **OK**.

7. DRAGON CENTER will open the web browser to download **OneDC_SDK.exe** file.

8. Execute **OneDC_SDK.exe** and click **Next** to continue the process.
9. Select **I accept the agreement** and click **Next** to continue the process.

![License Agreement](image1)

10. Click **Install** to continue with the installation.

![Ready to Install](image2)

11. Click **Finish** to complete the process.

![Completing the Setup Wizard](image3)
12. Please wait while UI is loading.

13. You can start to use DRAGON CENTER.
Launching DRAGON CENTER
Select the Start button, then select Dragon Center.

How to completely remove DRAGON CENTER
1. Select the Start button, then select settings.
2. Select Apps.

3. Uninstall Dragon Center.

4. Uninstall MSI SDK.

Game Optimization

The Gaming Mode feature will optimize the computer system, monitor, cooler and other peripherals to provide the best gaming experience.

Gaming Mode

Select **Gaming Mode** in the sub menu to enter Gaming Mode control panel.

Applications Optimized by Gaming Mode

⚠️ **Important**

Gaming Mode doesn’t support PRO Series Motherboards.

Gaming Mode Option

Game Mode switches and option settings are available in the upper right corner of each game icon. You can choose whether the game applies Game Mode, such as System Performance, True Color, Nahimic and Touchpad Disable while playing the game.
How to Add Games into Gaming Mode

Click **Add Game** button. Then select the game’s `.exe` file.

![Add Game button](image1)

![Add Game button](image2)
How to Remove Games from Gaming Mode

1. Click **Remove Game** icon.

2. When prompted, click **Yes** button to confirm this deletion, or click **Cancel** button to cancel this process.
How to Enable Gaming Mode

You can enable the Gaming Mode for System Performance, True Color, Nahimic, Mystic Light and Game Highlights while playing the game.

1. Select the installed game icon in Home > Gaming Mode.

2. Check Gaming Mode Options.

3. Enable Gaming Mode switch.

4. Enable Gaming Mode main switch.

5. Play the game.
User Scenario

Selecting User Scenario

The DRAGON CENTER has default scenarios and customized preset options.

1. Go to Home > User Scenario.

2. Select one of the options.

- **Extreme Performance** – A configuration that boosts the highest possible performance for AAA games, and enable overclocking.

- **Balance** - MSI recommended settings for average users.

- **Silent** – A configuration that allows system to run smoothly with minimum loading.

- **Customize** - Customize the performance level and fan speed as desired.

How to Cancel the Selected User Scenario

1. Click on the selected scenario again.

2. Restart your computer to apply the BIOS settings.
**Setting User Options**

Under User icon, click the gear icon to customize user options.

**How to Adjust the CPU Frequency**

1. On Home > User Scenario, click Customize.
2. Click the **MB > CPU Frequency** setting.

Click here to adjust CPU ratio and Base Clock frequency (BCLK). You can also fill the value in the input box with your keyboard.

CPU frequency = Ratio * BCLK

Select all or individual cores

Apply changes

Default values
How to Adjust the Motherboard Voltage

1. On Home > User Scenario, click Customize.
2. Click the MB > Voltage setting.

Click here

Click - / + to adjust voltage value. You can also fill the value in the input box with your keyboard.

Adjusting the Fan Speed

Fan speed control panel provides Smart Fan and Manual Fan. You can switch the control mode by clicking the Smart Fan and Manual Fan tabs on the top of the Fan control panel.

How to enter the fan speed control panel
1. On Home > User Scenario, click Customize.
2. Click the **Fan > CPU/ PUMP/ SYS fan setting**.

How to use the Smart Fan control panel

The Smart Fan control panel contains 4 dots which allows you to drag and adjust the Smart Speed slopes. The fan speed will change along with the Smart Speed curve.

- **Current fan speed**
- **The white dot will create strip chart in real time.**
- **Default setting**
- **Fan Tune - click to automatically optimize the smart fan setting.**
How to use the Manual Fan control panel

Click the percentage to manually control the fan speed.

Fan Tune - click to automatically optimize the smart fan setting.

Current fan speed

Default setting
How to Enable MSI Fast Boot

The MSI Fast Boot feature can shorten boot time.

1. On Home > User Scenario, click Customize.
2. Click the **MSI Fast Boot** to enable.

3. Click the Apply button to apply change.
4. Reboot, MSI Fast Boot will be enabled.
Monitor

Monitor feature provides a custom hardware monitor gadget to display the system status.

Select Monitor in the sub menu to enter Monitor page

How to Use the Hardware Monitor

1. Go to Home > Monitor.
2. Enable the Hardware Monitor switch in the upper right corner, and the Hardware Monitor gadget will appear.
3. Click the gear icon in the top left corner of the Hardware Monitor gadget to open the monitoring item menu.

4. Select the item you want to display in the gadget.
Game Highlights

Game Highlights feature will automatically capture clips of amazing gameplay moments. It looks for certain events which occurs in games, and saves the captured videos in your local folder.

⚠ Important

Game Highlights feature only supports certain series Motherboards. In addition, this function is currently available in Fortnite, League of Legends, and Apex Legends.
How to Share Game Highlights to Social Media

Game Highlights feature supports uploading videos directly to social media, such as YouTube, Twitter, and Discord.
How to Remove Game Highlights

You can choose to delete game highlight video which includes several clips or to remove one single game highlight clip from the whole game video.

Click here to remove the game highlight video

Click here to remove the game highlight clip
Installing MSI Companion

Before you enable Game Highlights function, you should install MSI Companion first.

1. Go to Home > Game Highlights.
2. When a prompt window appears, click **Download MSI Companion app**.

3. Execute **MSI Companion-Installer.exe**, and click **Next** to continue the process.

4. Select **I have read and accepted Overwolf’s terms and Privacy Policy**.
5. After finishing MSI companion and Overwolf Installation, click **Launch** to activate MSI companion.

---

**How to Activate MSI Companion**

You can activate MSI companion by one of the following methods:

- Open Overwolf in System Tray, and click MSI Companion.
- Press ctrl + tab in games to open Overwolf, and click MSI Companion.
- Click MSI Companion on the desktop.
Setting MSI Companion

After activating MSI Companion app, you will see a pop-up window displaying detailed settings for Quick Settings, System Monitor, and Audio Monitor.

On Quick Settings tab

- Linked to User Scenario setting in Dragon Center
- Linked to True Color setting in Dragon Center

- Adjust system volume
- Adjust mouse sensitivity
On System Monitor tab

- Turn on System Monitor to display system performance in games.
- Select the system performance you want to display on the screen.
- Turn on to save log files for system monitoring.
- Adjust transparency for monitor background.
- Select black/white monitor background.

You can choose one from these two display ways, it will show an in-game overlay with the pattern you select.

- Default

- Minimize
On Audio Monitor tab

Turn on to display whether Nahimic surround function is enabled or not

Display audio information of identified applications with sounds

⚠ Important

- Audio Monitor only works properly when Nahimic is installed.
- Audio formats among browsers are NOT supported by Audio Monitor.
How to Discover MSI Companion

1. Go to Home > Game Highlights.
2. When a prompt window appears, click Discover MSI Companion app.
Setting Game Highlights

- Select Game Highlights in the sub menu, click setting.

Adjust settings for Games, Capture, and Storage.

On Games tab

On/Off Game Highlights

Click here
On Capture tab

Adjust hotkey settings for manual capture

On Storage tab

Select Auto Manage/ Manual Manage for file size and disk space settings
True Color

True Color lets you adjust the color gamma, saturation, brightness and contrast of your screen for the best viewing experience.

The True Color feature supports games in windowed mode.

Select True Color in the sub menu to enter True Color control panel

Select the quick screen color option

True Color Preset Options

When you click the preset option, the screen color changes quickly and immediately. The color settings for each option are as follows:

- **EyeRest** - reduces blue light of your computer screen for eye care.
- **Gaming** - enhances the contrast of the screen.
- **Movie** - enhances the dynamic contrast of the screen.
- **Customize** - allows you to adjust gamma, contrast and color balance of your computer screen. Please refer to the instructions below.
- **Default** - uses the system default setting.
How to customize screen color

The True Color control panel has a **Customize** feature that allows you to customize your own colors.

1. Click the gear icon at the bottom of the Customize icon.

![Click the gear icon](image)

2. Click and drag the sliders to adjust the Gamma, Level, Brightness and Contrast on Red, Green and Blue tabs.

![Adjust sliders](image)

3. Click the Apply button to save the settings.
LAN Manager

LAN Manager is applied to Windows 10 network traffic shaping. It keeps your internet speed stable and faster during heavy uploads/downloads and reduces the ping value of online games. If your motherboard has a Wi-Fi module, it can also provide virtual access point functionality for your mobile device for traffic shaping.

To use LAN Manager:

1. Install the LAN driver.
2. Connect your computer to the internet.
3. Go to Home > LAN Manager.

Network Control Menu

There are menus in the LAN Manager Control Panel that allow you to access the relevant Network Control function.

- **Priority** - customizes application network bandwidth priorities.
- **Usage** - displays the application network usage status.
- **Network Test** - allows you to setup bandwidth control.
- **Advanced Setting** - allows you to expand RWIN to accelerate download speed. You can also block IP address and setup virtual access point.
Setting Network Speed

1. Select the **Network Test** control panel.

2. Click **Test Network Speed**.

3. cFos Speed Test web page will be opened.

4. Click **Start RX Test** to test **Upload speed**, and click **Start TX Test** to test **Download speed**.

5. Fill in the speed test results in the **Upload speed** and **Download speed** input boxes.

6. Check the **Enable Bandwidth Control** checkbox.
Customizing Application Priorities

The Priority control panel displays currently using network bandwidth applications.

1. Test and set the network speed as described previously.
2. Select the **Priority** control panel.

3. Use the category bar to filter the displayed applications categories.

4. Click the drop-down menu next to the application name to select the priority of the application.

*Note: To stop some applications from using bandwidth, you can click ![Block button] to block the application.*
Mystic Light

Mystic Light feature allows you to control LED light effects of MSI & partner products. For some earlier products, you can go to product download page to download the applicable LED control software.

When you click the Apply button, the LED effect settings can be saved to Profile1–3, and you can switch to different settings by clicking Profile1–3.

• **Device synchronization** - In this section, you may synchronize LED light effect to your devices.

- **All synchronization** - Click the big chain icon on the left side of all the devices.

- **To synchronize devices** - Click the chain icon above device icon. When the chain icon turns red, it indicates that the device has synchronized LED effect settings with other devices.

- **Individual** - You can also change settings for single device. To do that, click the chain icon and turn the color to gray as below.

- **LED item drop-down menu** - Click to select the LED item on the device. The LED effects vary depending on your LED item selection.
• **Light effect drop-down menu**

Click to select LED light effects. Please note that for light effect, the option would be more or less depending on the devices you have, it will only list the light effects which are available for all included devices.

![Light effect drop-down menu](image)

• **LED Color selector** - In this section, you may select the color for single light effects (Stack, Breathing, Flashing etc.).

The outer arc is a custom color picker and the inner arc is the default color picker that cannot be changed. You can simply change the LED color by clicking on the color on the outer or inner arc. To store a custom color, click one of the color slots on the outer arc to store the color of your choice.

![LED Color selector](image)

- You can specify a color by editing an RGB (red, green, blue) value between 0 and 255.
- Drag the brightness slider up to increase brightness or drag down to decrease brightness.
- Use the Hue Circle to choose the color you want. The color you choose will be displayed on the center circle.

• **Effect speed and brightness level**

Drag the sliders to adjust the LED light effect switching speed and light brightness.

*Please note that these functions will only be available if your device supports it.*

![Effect speed and brightness level](image)
Voice Command
Mystic Light allows you to use your voice to change LED effects.
To start Voice Command, you need to install Windows 10 Speech Voices.
1. Go to Windows Settings, select **Time & Language**.

2. Select **Add a preferred language**, then add **English** and the voice packages.
3. Change your default speech options to **English** by selecting **Speech**.
How to Control Mystic Light via Voice Command

On Home > Mystic Light, click **setting** in the upper right corner. Enable Voice Command and then you can change the LED style by saying **Hey Lucky**.

⚠ **Important**
If the Voice Command option does not appear, try uninstalling the MSI SDK and Dragon Center. Then reinstall Dragon Center again.
Ambient Link

With the Ambient Link feature, it will provide visual color feedback on Philips Hue and Nanoleaf depending on what is happening in your game. To use Ambient Link, you need to follow the instructions below to complete the link setup.

Supported Motherboards

- MEG Z390 GODLIKE
- MEG Z390 ACE
- MPG Z390 GAMING PRO CARBON AC
- MPG Z390 GAMING EDGE AC
- Z390I CORSAIR
- MPG Z390M GAMING EDGE AC
- MPG X570 GAMING PRO CARBON WIFI
- MPG Z390I GAMING EDGE AC
- MEG X570 GODLIKE
- MEG X570 ACE

- MPG B550 GAMING CARBON WIFI
- MPG B550 GAMING EDGE WIFI
- MPG B550I GAMING EDGE WIFI
- MAG B550M MORTAR WIFI

Network Requirements

- The router is broadcasting a 2.4GHz network.
- The Wi-Fi network is using WPA/WPA2 security.
- The router is configured for any of the Wi-Fi modes a/b/g/n.

Philips Hue Setup (optional)

1. Plug in your Hue bridge and it will automatically power up.
2. Connect it to the router LAN port.
3. Wait for the two lights to come on and you are good to go. (Left is power light and center is local network)

Nanoleaf Setup (optional)

- The router is compatible with Bonjour (mDNS).
Ambient Link Control Panel

**Game Mode** and **Ambient Mode** can only be activated one at a time in the Ambient Link control panel.

- **Game Mode tab**

  - Click to synchronize/ non-synchronize the game
  - Synchronization main switch
  - Click to access the game control panel
  - Back
  - Select Game Event, color and brightness
  - Preview the effect
  - Apply changes
• Ambient Mode tab

- Click to select an effect as background light
- Preview the effect
- ON/OFF background light & music
- Click to detect devices
- Adjust orientation or position
- Apply changes
- Drag the slider to adjust light brightness

• Ambient Link tab

- Click to switch to Philips Hue and Nanoleaf
- Status indicator
- Click to detect devices
- Click to synchronize
- Re-synchronize
- Remove the device
- Adjust orientation or position

Gaming Gear
This panel allows you to control MSI’s gaming gear and supported third-party devices.

Select **Gaming Gear** in the sub menu to enter Gaming Gear menu.

Supported devices will be displayed here. Click to enter the control panel of the device.
Product Registration

Register your MSI product to get exclusive updates, quicker service and product support.

Select **My Device** in the sub menu to register your product.

Login to your MSI account on this My Device tab. If you don’t have an MSI account, please click the **Join MSI Member** button or use Facebook, Google Plus to login.

Click the **Product Register** button and fill in the product registration form.
Live Update

Live Update feature allows you to scan system and download the latest drivers, BIOS and utilities. With Live Update, you don’t need to search the drivers on websites, and don’t need to know the models of motherboard and graphics cards. Live Update will download the appropriate drivers automatically.

To use Live Update:
1. Connect your computer to the internet.
2. Go to Support > Live Update.
**System Info**

The System Info provides information about your computer drivers, BIOS and utilities versions.

**To open System Info:**

1. Go to Support > System Info.

**To export system information:**

1. Go to Support > System Info.
2. Click *Export System Info* button in the upper right corner.
3. Browse to the location where you want to save the new text file, and then click *Save.*
Microsoft APP

The Microsoft App feature detects installed drivers and displays a relative Microsoft application download links.

To install Microsoft App:

2. Click the Get it from Microsoft icon to the right of the item.
3. Download and install the application from Microsoft Store.
Gaming Hotkey (Install by Live Update)

Gaming Hotkey provides instant control of the system through user defined hotkeys.

Tools > Gaming Hotkey

⚠ Important
Gaming Hotkey doesn’t support PRO Series Motherboards.

Recording a Macro

1. Enter Macro Genie sub-menu.

2. Click Record and then perform the actions to record the macro.

3. To stop recording the macro, click Stop.

You can specify a hotkey to change the mouse’s DPI.

Select the DPI percentage in the drop-down menu. The higher DPI the more sensitive your mouse is.

Set the hotkey to change the DPI.

Default Button - reverts to the default DPI setting.

Apply Button - applies changes.

Use the mouse to draw on this test area to test the DPI settings.

Clear Button - clears the test area.
Smart Tool (Install by Live Update)

Tools > Smart Tool

Smart Tool is a tool that can help you to create your Windows installation USB flash drive, and it can also create a super RAID.

Main menu

The main menu allows you to choose Smart Tool or SUPER RAID.

⚠ Important

The Super RAID button is only available when your system equipped with at least 3 hard-disk drives (1 system disk and 2 data disks).

How to Create a Windows Installation USB Flash Drive

Before you can create your Windows installation USB flash drive, you’ll need to have your Windows Installation Disc or ISO file, and also have a minimum of an 8GB USB flash drive to create your installer. Be sure to backup files on the USB drive, this process will erase it.

1. Click Smart Tool.
2. Choose Windows Installation source file. Click Browse button to select the directory or click button to select an ISO file.
3. Choose USB storage and select your USB flash drive in the drop-down list. In case the USB flash drive is not listed, click Refresh Drive button.
4. If you want to install Windows on the RAID drive, select the RAID driver version from the drop-down menu.
5. If you want to add NVMe drive for your NVMe SSD drive, check the Add NVMe driver checkbox.
6. Click **Start** to complete the process. When prompt **Finish!**, click **OK**.

⚠ **Important**
You can also create an installer ISO image file by selecting the **ISO destination**, and then burn it onto the **DVD**. However, this method does not support RAID drive.

**Super RAID**
This utility allows you to create a super RAID in Windows system.

⚠ **Important**
The **Super RAID** button is only available when your system equipped with at least 3 hard-disk drives (1 system disk and 2 data disks).

**How to Create a Super RAID**

1. Click **Super RAID**.
2. Use checkboxes to select the disks you want included in your RAID.
3. Choose **Speed Up** or **Backup** for RAID type.
   - Speed Up = RAID0
   - Backup = RAID1
4. Click **Start**.
5. When prompt **Finish!**, click **OK**.

⚠ **Important**
**SUPER RAID** can’t include the system disk.
How to Uninstall Intel® Optane™ Memory

When you installed the operating system in AHCI mode, the system will be changed to RAID/ Optane mode after enabling Intel Optane Memory. If you want to uninstall Intel Optane Memory and switch BIOS setting from RAID/ Optane mode back to AHCI mode, that may cause operating system damage. MSI has developed a tool assistance you to uninstall Intel Optane Memory and switch back to AHCI mode while keep the system bootable.

⚠ Important
The Optane button is only available when Intel Optane Memory Enable or Intel Rapid Storage Technology Enable.

1. Click the Optane button.
2. When prompt Restart your computer to finish uninstalling Optane function? click OK.
3. Reboot System.
Voice Boost (Install by Live Update)

Voice Boost is an audio mixer that manages the VoIP and apps audio volume. The gamer needs to set the level of priority of his or her voice, then Voice Boost will automatically manage and make sure the voice is clearer by decreasing dynamically the volume of the other apps. And when no more voice is detected, all volumes return to normal.

Tools > Voice Boost

⚠️ Important
- The Voice Boost function is only available with Nahimic 2.5/3 and voice communication tools (TeamSpeak, Raidcall, Skype, SkypeHost and Discord).
- Voice Boost doesn’t support PRO Series Motherboards.

Enabling Voice Boost

1. Install Nahimic and a voice communication tool.
2. Turn on the Voice Boost with the On/Off switch at the top of the screen.
3. Select your voice communication tool.
4. Adjust the volume ratio in voice communication tool.
Super Charger (Install by Live Update)

Tools > Super Charger

Super Charger provides i-Pad, i-Phone and iPod charging function.

The iPad with very special charging requirements as it requires 1.6A power supply rather than the 0.5A current available with conventional USB interfaces. That is ordinary computer cannot charge your iPad even at power on status. The MSI Super Charger is a Windows resident program capable of revising power supply mode of your USB port. Once an iPad is connected to your USB port the Super Charger sends a signal to initiate its charging circuit.

Enabling Super Charger

Super Charger function will be enabled automatically after installing Super Charger.

If your motherboard has a Super Charger Port (please refer to the motherboard user manual), the following dialog will appear. Click the On checkbox.

When system goes into suspend, hibernate state or even shutdown, Super Charger Port will be still able to provide charging function.

When a warning prompt window appears, click Yes to continue.

⚠ Important

When Super Charger is enabled, the Super Charger Port will be changed to Charging mode, therefore, the data syncing will be disabled.
DPC Latency Tuner (Install by Live Update)

Tools > DPC Latency Tuner

DPC LATENCY TUNER is a convenient tool that helps you optimize your PC settings to get a smooth audio/video playback experience and a faster responsive system. For instance, you can regulate the CPU, iGPU ratio and DRAM frequency easily when playing different games. The higher iGPU frequency multiplication can bring well image resolution.

Adjust CPU, memory and iGPU settings.

Selecting CPU Ratio Apply Mode

Different games have their own appropriate core, and you can change it to **All Core**, **Turbo Ratio** and **Per Core** by adjusting the **CPU Ratio Apply Mode** to acquire the best gaming experience.
