# Safety Information

- The components included in this package are prone to damage from electrostatic discharge (ESD). Please adhere to the following instructions to ensure successful computer assembly.
- Ensure that all components are securely connected. Loose connections may cause the computer to not recognize a component or fail to start.
- Hold the motherboard by the edges to avoid touching sensitive components.
- It is recommended to wear an electrostatic discharge (ESD) wrist strap when handling the motherboard to prevent electrostatic damage. If an ESD wrist strap is not available, discharge yourself of static electricity by touching another metal object before handling the motherboard.
- Store the motherboard in an electrostatic shielding container or on an anti-static pad whenever the motherboard is not installed.
- Before turning on the computer, ensure that there are no loose screws or metal components on the motherboard or anywhere within the computer case.
- Do not boot the computer before installation is completed. This could cause permanent damage to the components as well as injury to the user.
- If you need help during any installation step, please consult a certified computer technician.
- Always turn off the power supply and unplug the power cord from the power outlet before installing or removing any computer component.
- Keep this user guide for future reference.
- Keep this motherboard away from humidity.
- Make sure that your electrical outlet provides the same voltage as is indicated on the PSU, before connecting the PSU to the electrical outlet.
- Place the power cord such a way that people can not step on it. Do not place anything over the power cord.
- All cautions and warnings on the motherboard should be noted.
- If any of the following situations arises, get the motherboard checked by service personnel:
  - Liquid has penetrated into the computer.
  - The motherboard has been exposed to moisture.
  - The motherboard does not work well or you can not get it work according to user guide.
  - The motherboard has been dropped and damaged.
  - The motherboard has obvious sign of breakage.
- Do not leave this motherboard in an environment above 60°C (140°F), it may damage the motherboard.

- **Application Enhancement** - the array of options will provide you a complete guidance of anticipated sound effect for both output and input device.
- **Main Volume** - controls the volume or balance the right/left side of the speakers that you plugged in front or rear panel by adjust the bar.
- **Profiles** - toggles between profiles.
- **Advanced Settings** - provides the mechanism to deal with 2 independent audio streams.
- **Jack Status** - depicts all render and capture devices currently connected with your computer.
- **Connector Settings** - configures the connection settings.

## Auto popup dialog

When you plug into a device at an audio jack, a dialogue window will pop up asking you which device is current connected.

Each jack corresponds to its default setting as shown on the next page.

## CPU Socket

Please use the Torx screwdriver come with the AMD CPU and follow the steps below to install the CPU.

### **Video Demonstration**

Watch the video to learn how to unbox and install AMD Ryzen Threadripper CPU.

<https://youtu.be/yk4EpVUU03E>

1. Loosen load plate screws with the AMD Torx screwdriver in the sequence 3→2→1. The load plate will automatically lift up to the fully open position.

2. Slide out the External Cap from the frame rail, and then slide the Carrier Frame with CPU into the frame rail. Make sure that the Carrier Frame with CPU has been properly installed in the frame rail.

3. Remove the protective pin cap, and then close and buckle the frame rail.

4. Close the load plate, and then turn the load plate screws clockwise a little with the AMD Torx screwdriver in the sequence 1→2→3→1→2→3 until they are snug.

5. Tighten load plate screws until you hear a click from the AMD Torx screwdriver.

**⚠ Important**

*If the load plate is not secured properly, the computer will not power on.*

6. Apply thermal paste on the top of the CPU.

7. Place the heatsink on the motherboard, align the bolts with the mounting nuts on the motherboard. Then, tighten the bolts in a diagonal order to spread the tension properly across the sides.
8. Finally, attach the CPU fan cable to the CPU fan connector on the motherboard.

### **Important**

- Always unplug the power cord from the power outlet before installing or removing the CPU.
- Please retain the protective caps after installing the processor. MSI will deal with Return Merchandise Authorization (RMA) requests if only the motherboard comes with the protective caps on the CPU socket.
- When installing a CPU, always remember to install a CPU heatsink. A CPU heatsink is necessary to prevent overheating and maintain system stability.
- Confirm that the CPU heatsink has formed a tight seal with the CPU before booting your system.
- Overheating can seriously damage the CPU and motherboard. Always make sure the cooling fans work properly to protect the CPU from overheating. Be sure to apply an even layer of thermal paste (or thermal tape) between the CPU and the heatsink to enhance heat dissipation.
- Whenever the CPU is not installed, always protect the CPU socket pins by covering the socket with the plastic cap.
- If you purchased a separate CPU and heatsink/ cooler, Please refer to the documentation in the heatsink/ cooler package for more details about installation.
- This motherboard is designed to support overclocking. Before attempting to overclock, please make sure that all other system components can tolerate overclocking. Any attempt to operate beyond product specifications is not recommended. MSI® does not guarantee the damages or risks caused by inadequate operation beyond product specifications.

## OC1: GAME BOOST Knob

This knob allows you to manually select a stage from number 0 (default) to number 11 (extreme) for overclocking the processor. The processor's voltage and frequency will be automatically adjusted after you power on your computer.

### Using GAME BOOST Knob

To setup the GAME BOOST knob, take the following steps:

1. Set the GAME BOOST knob to hardware mode in BIOS Setup.
2. Power off the computer.
3. Rotate the GAME BOOST knob to select the overclocking stage as you desire.

Stage	CPU Frequency			
	TR 1950X	TR 1920X	TR 1920	TR 1900X
0	3.4 GHz	3.5 GHz	3.2 GHz	3.8 GHz
1	3.75 GHz	3.85 GHz	3.55 GHz	4.15 GHz
2	3.8 GHz	3.9 GHz	3.6 GHz	4.2 GHz
4	3.85 GHz	3.95 GHz	3.65 GHz	4.25 GHz
6	3.9 GHz	4 GHz	3.7 GHz	4.3 GHz
8	3.95 GHz	4.05 GHz	3.75 GHz	4.35 GHz
10	4 GHz	4.1 GHz	3.8 GHz	4.4 GHz
11	4.1 GHz	4.2 GHz	3.9 GHz	4.5 GHz

4. Power on and then GAME BOOST will automatically overclock processor depending on the stage you selected.

To disable GAME BOOST:

1. Set the GAME BOOST knob to HW mode in BIOS Setup.
2. Power off the computer.
3. Rotate the GAME BOOST knob to 0 and then power on. The configuration parameters will be returned to default values.

### Important

• You can also control the GAME BOOST function in **BIOS Setup** or with **MSI COMMAND CENTER** software.

• In order to optimize performance and improve system stability, when you activate the GAME BOOST function, please leave the settings in the **BIOS > OC** menu unchanged.

- The success of overclocking depends on the components of your computer.
- We do not guarantee the GAME BOOST overclocking range or the damages/ risks caused by overclocking behavior.
- MSI components are recommended for better compatibility when using GAME BOOST function.

## JSLOW1: Slow Mode Booting Jumper

This jumper is used for LN2 cooling solution, that provides the extreme overclocking conditions, to boot at a stable processor frequency and to prevent the system from crashing.

Normal  
(default)

Enabled  
(Please enable this jumper during BIOS POST.)

### **Important**

- Users will try extreme low temperature overclocking at their own risks. The overclocking results will vary according to the CPU version.
- Please don't switch to **Enabled** when power-off or the system will be un-bootable.

## DIMM Slots

## Memory module installation recommendation

	D2	D1	C2	C1	CPU Socket	A1	A2	B1	B2
1 DIMM					SocketTR4 CPU				✓
2 DIMMs	✓								✓
4 DIMMs	✓		✓				✓		✓
8 DIMMs	✓	✓	✓	✓		✓	✓	✓	✓

### **Important**

- Always insert a memory module in the **DIMMB2** slot first.
- To ensure system stability for Dual/ Triple/ Quad channel mode, memory modules must be of the same type, number and density.
- Due to chipset resource usage, the available capacity of memory will be a little less than the amount of installed.
- The Memory DIMM voltage below 1.35V is suggested to protect the CPU.
- Please note that the maximum capacity of addressable memory is 4GB or less for 32-bit Windows OS due to the memory address limitation. Therefore, we recommend that you to install 64-bit Windows OS if you want to install more than 4GB memory on the motherboard.
- It is recommended to use a more efficient memory cooling system for full DIMMs installation or overclocking.
- The stability and compatibility of installed memory modules depend on installed CPU and devices when overclocking.

## PCI\_E1~6: PCIe Expansion Slots

### Multiple graphics cards installation recommendation

\* To prevent monitor blank during the system POST. If you have multiple graphics cards installed, as marked above, connect your monitor to the graphics card located on the first PCIe x16 slot.

## Important

- If you install a large and heavy graphics card, you need to use a tool such as **MSI Gaming Series Graphics Card Bolster** to support its weight and to prevent deformation of the slot.
- For a single PCIe x16 expansion card installation with optimum performance, using the **PCI\_E1** slot is recommended.
- When adding or removing expansion cards, always turn off the power supply and unplug the power supply power cable from the power outlet. Read the expansion card's documentation to check for any necessary additional hardware or software changes.

## Installing SLI graphics cards

For power supply recommendations for SLI configurations, please refer to the user guide of your graphics card to make sure you meet all the system requirements.

To install SLI graphics cards:

1. Turn off your computer and disconnect the power cord, install two graphics cards into the **PCI\_E1** and **PCI\_E4** slots.
2. Connect the two cards together using the **SLI Bridge Connector**.

3. Connect all PCIe power connectors of the graphics cards.
4. Reconnect the power cord, power up the computer and install the drivers and software included in your graphics card package.
5. Right-click the Windows desktop and select **NVIDIA Control Panel** from the menu, click on **Configure SLI, Surround, PhysX** in the left task pane and select **Maximize 3D performance** in the SLI configuration menu, and then click **Apply**.

## Installing the Wi-Fi/Bluetooth PCIe card

1. Install the Wi-Fi/Bluetooth PCIe card in a PCIe x1 slot.
2. Connect one end of the USB cable to the USB connector on the card.
3. Connect the other end of the USB cable to the USB 2.0 connector on the motherboard.
4. Use the screw to secure the card.
5. Screw the antennas tight to the RP-SMA connectors on the Wi-Fi/Bluetooth PCIe card as shown.

### **Important**

*Make sure all cables are properly connected.*

## M2\_1~3: M.2 Slots (Key M)

### Video Demonstration

Watch the video to learn how to use M.2 Shield.

<https://youtu.be/NwtQBpkUazs>

### Installing M.2 module

1. Remove the screw from the base screw.
2. Remove the base screw.
3. Tighten the base screw into the hole of the distance to the M.2 slot as the length your M.2 module.
4. Insert your M.2 module into the M.2 slot at a 30-degree angle.
5. Put the screw in the notch on the trailing edge of your M.2 module and tighten it into the base screw.

### Using M.2 shield

We provide the M.2 shields on the M.2 slots to help dissipate heat away from the M.2 modules. Before installing the M.2 module for the first time, you need to remove the screw, lift the cover and **remove the protective film and the round rubber** from the thermal pad.

#### Important

If you don't need the M.2 shield, you can remove it.

## SATA1~8: SATA 6Gb/s Connectors

These connectors are SATA 6Gb/s interface ports. Each connector can connect to one SATA device.

### Important

- Please do not fold the SATA cable at a 90-degree angle. Data loss may result during transmission otherwise.
- SATA cables have identical plugs on either sides of the cable. However, it is recommended that the flat connector be connected to the motherboard for space saving purposes.

## JFP1, JFP2: Front Panel Connectors

These connectors connect to the switches and LEDs on the front panel.

## CPU\_PWR1~2, ATX\_PWR1, PCIE\_PWR1: Power Connectors

These connectors allow you to connect an ATX power supply.

1	+12V	4	Ground
2	+12V	5	Ground
3	+12V	6	Ground

### Important

- Make sure that all the power cables are securely connected to a proper ATX power supply to ensure stable operation of the motherboard.
- It is recommended that connect both CPU\_PWR1 and CPU\_PWR2 to 12V power supply (especially when overclocking).
- It is recommended to use a power supply with more than 500W.

## JUSB1~2: USB 2.0 Connectors

These connectors allow you to connect USB 2.0 ports on the front panel.

1	VCC	2	VCC
3	USB0-	4	USB1-
5	USB0+	6	USB1+
7	Ground	8	Ground
9	No Pin	10	NC

### Important

- Note that the VCC and Ground pins must be connected correctly to avoid possible damage.
- In order to recharge your iPad, iPhone and iPod through USB ports, please install MSI® SUPER CHARGER utility.

## JUSB4~5: USB 3.1 Gen1 Connectors

These connectors allow you to connect USB 3.1 Gen1 ports on the front panel.

1	Power	11	USB2.0+
2	USB3_RX_DN	12	USB2.0-
3	USB3_RX_DP	13	Ground
4	Ground	14	USB3_TX_C_DP
5	USB3_TX_C_DN	15	USB3_TX_C_DN
6	USB3_TX_C_DP	16	Ground
7	Ground	17	USB3_RX_DP
8	USB2.0-	18	USB3_RX_DN
9	USB2.0+	19	Power
10	NC	20	No Pin

### Important

Note that the Power and Ground pins must be connected correctly to avoid possible damage.

## Charger Port

The **JUSB5** connector is a charger port which can increase USB power output for fast charging your smartphone or USB-powered devices. The Charger Port is hardware controlled by motherboard chip, it can still charge your device in suspend, hibernate state or even shutdown states. However, when you boot the computer into Windows®, you will need to install the MSI® SUPER CHARGER application to turn ON/OFF the Charging mode.

### **Video Demonstration**

Watch the video to learn how to charge the smartphone with Super-Charger.

<http://youtu.be/FCyvj5Nb0w>

### **Important**

When the Charging mode is enabled, the Charger Port data syncing will be disabled.

## JUSB3: USB 3.1 Gen2 Type-C Connector

This connector allows you to connect USB 3.1 Gen2 Type-C connector on the front panel. The connector possesses a foolproof design. When you connect the cable, be sure to connect it with the corresponding orientation.

## CPU\_FAN1, PUMP\_FAN1, SYS\_FAN1~4: Fan Connectors

Fan connectors can be classified as PWM (Pulse Width Modulation) Mode or DC Mode. PWM Mode fan connectors provide constant 12V output and adjust fan speed with speed control signal. DC Mode fan connectors control fan speed by changing voltage. When you plug a 3-pin (Non-PWM) fan to a fan connector in PWM mode, the fan speed will always maintain at 100%, which might create a lot of noise. You can follow the instruction below to adjust the fan connector to PWM or DC Mode.

### Default PWM Mode fan connectors

### Default DC Mode fan connectors

### Important

- You can switch between PWM mode and DC mode and adjust fan speed in **BIOS > HARDWARE MONITOR**.
- Make sure fans are working properly after switching the PWM/ DC mode.

### Pin definition of fan connectors

PWM Mode pin definition			
1	Ground	2	+12V
3	Sense	4	Speed Control Signal

DC Mode pin definition			
1	Ground	2	Voltage Control
3	Sense	4	NC

## JAUD1: Front Audio Connector

This connector allows you to connect audio jacks on the front panel.

			
1	MIC L	2	Ground
3	MIC R	4	NC
5	Head Phone R	6	MIC Detection
7	SENSE_SEND	8	No Pin
9	Head Phone L	10	Head Phone Detection

## JCI1: Chassis Intrusion Connector

This connector allows you to connect the chassis intrusion switch cable.

Normal  
(default)

Trigger the chassis  
intrusion event

### Using chassis intrusion detector

1. Connect the **JCI1** connector to the chassis intrusion switch/ sensor on the chassis.
2. Close the chassis cover.
3. Go to **BIOS > Settings > Security > Chassis Intrusion Configuration**.
4. Set **Chassis Intrusion** to **Enabled**.
5. Press **F10** to save and exit and then press the **Enter** key to select **Yes**.
6. Once the chassis cover is opened again, a warning message will be displayed on screen when the computer is turned on.

### Resetting the chassis intrusion warning

1. Go to **BIOS > Settings > Security > Chassis Intrusion Configuration**.
2. Set **Chassis Intrusion** to **Reset**.
3. Press **F10** to save and exit and then press the **Enter** key to select **Yes**.

## JTPM1: TPM Module Connector

This connector is for TPM (Trusted Platform Module). Please refer to the TPM security platform manual for more details and usages.

1	LPC Clock	2	3V Standby power
3	LPC Reset	4	3.3V Power
5	LPC address & data pin0	6	Serial IRQ
7	LPC address & data pin1	8	5V Power
9	LPC address & data pin2	10	No Pin
11	LPC address & data pin3	12	Ground
13	LPC Frame	14	Ground

## JBAT1: Clear CMOS (Reset BIOS) Jumper

There is CMOS memory onboard that is external powered from a battery located on the motherboard to save system configuration data. If you want to clear the system configuration, set the jumpers to clear the CMOS memory.

Keep Data  
(default)

Clear CMOS/  
Reset BIOS

### Resetting BIOS to default values

1. Power off the computer and unplug the power cord
2. Use a jumper cap to short JBAT1 for about 5-10 seconds.
3. Remove the jumper cap from JBAT1.
4. Plug the power cord and power on the computer.

## POWER1, RESET1: Power Button, Reset Button

The Power / Reset button allows you to power on / reset the computer.

Power button

Reset button

## JRGB1, JRAINBOW1: RGB LED connectors

The JRGB1 connector allows you to connect the 5050 RGB LED strips 12V. The JRAINBOW1 connector allows you to connect the Rainbow 5050 RGB LED strips 5V.

JRGB1			
1			
1	+12V	2	G
3	R	4	B

JRAINBOW1			
1			
1	C1	2	D1
3	+5V	4	GND

### CAUTION

- Do not connect the wrong type of LED strips. The JRGB1 connector and the JRAINBOW1 connector provide different voltages, and connecting the 5V LED strip to the JRGB1 connector will result in damage to the LED strip.
- The JRGB1 connector has a plastic cap to prevent false connection of 5V LED strips.

### Important

- The JRGB1 connector supports 5050 RGB LED strips (12V/G/R/B) with the maximum power rating of 3A (12V).
- The JRAINBOW1 connector supports Rainbow 5050 RGB LED strips (C1/D1/5V/GND) with the maximum power rating of 3A (5V).
- Please keep the LED strip shorter than 2 meters to prevent dimming.
- Always turn off the power supply and unplug the power cord from the power outlet before installing or removing the RGB LED strip.
- Please use MSI's software to control the extended LED strip.

# Onboard LEDs

## EZ Debug LED

These LEDs indicate the debug status of the motherboard.

- CPU** - indicates CPU is not detected or fail.
- DRAM** - indicates DRAM is not detected or fail.
- VGA** - indicates GPU is not detected or fail.
- BOOT** - indicates the booting device is not detected or fail.

## PCIe x16 slot LEDs

These LED indicate the PCIe x16 slots status.

- PCI\_E1 LED
- PCI\_E3 LED
- PCI\_E4 LED
- PCI\_E6 LED

LED color	PCIe slot status
Red	x16 mode
White	x8, x4, x1 mode

## DIMM LEDs

These LED indicate the memory modules are installed.

## XMP LED

This LED indicates the XMP (Extreme Memory Profile) mode is enabled.

- DIMM LEDs
- XMP LED

## Fan LEDs

These LEDs indicate the fan control mode.

LED color	Fan control mode
Red	PWM mode
Green	DC mode

## LED light effect demonstration components

These components are used by retailers to demonstrate onboard LED light effects.

## Debug Code LED

The Debug Code LED displays progress and error codes during and after POST. Refer to the Debug Code LED table for details.

## Hexadecimal Character Table

<b>20</b>	System is waking up from the S2 sleep state
<b>30</b>	System is waking up from the S3 sleep state
<b>40</b>	System is waking up from the S4 sleep state
<b>AC</b>	System has transitioned into ACPI mode. Interrupt controller is in PIC mode.
<b>AA</b>	System has transitioned into ACPI mode. Interrupt controller is in APIC mode.

# Changing Plates

This section describes how to remove and replace the plates on the motherboard heatsink, I/O cover and audio cover.

## Replacing heatsink plate

1 Wrap the tip of the flat-head screwdriver in a cloth.

2 Use the flat end of the screwdriver into the corner of the plate as indicated above, and then to pry the plate away from the heatsink.

3 Remove the plate.

4 Replace the plate by gently pressing it into the heatsink as shown above.

## Replacing audio cover plate

1 Wrap the tip of the flat-head screwdriver in a cloth.

2 Use the flat end of the screwdriver into the corner of the plate as indicated above, and then to pry the plate away from the audio cover.

Remove the plate.

Replace the plate by gently pressing it into the audio cover as shown above.

## Replacing I/O cover plate

Use your finger to pry the plate away from the I/O cover as shown above.

Remove the plate.

Replace the plate by gently pressing it into the I/O cover as shown above.

# BIOS Setup

The default settings offer the optimal performance for system stability in normal conditions. You should **always keep the default settings** to avoid possible system damage or failure booting unless you are familiar with BIOS.

## **Important**

- *BIOS items are continuously update for better system performance. Therefore, the description may be slightly different from the latest BIOS and should be for reference only. You could also refer to the **HELP** information panel for BIOS item description.*
- *The pictures in this chapter are for reference only and may vary from the product you purchased.*

## Entering BIOS Setup

Press **Delete** key, when the **Press DEL key to enter Setup Menu, F11 to enter Boot Menu** message appears on the screen during the boot process.

### Function key

- F1:** General Help
- F2:** Add/ Remove a favorite item
- F3:** Enter Favorites menu
- F4:** Enter CPU Specifications menu
- F5:** Enter Memory-Z menu
- F6:** Load optimized defaults
- F7:** Switch between Advanced mode and EZ mode
- F8:** Load Overclocking Profile
- F9:** Save Overclocking Profile
- F10:** Save Change and Reset\*
- F12:** Take a screenshot and save it to USB flash drive (FAT/ FAT32 format only).
- Ctrl+F:** Enter Search page

\* When you press F10, a confirmation window appears and it provides the modification information. Select between Yes or No to confirm your choice.

## Resetting BIOS

You might need to restore the default BIOS setting to solve certain problems. There are several ways to reset BIOS:

- Go to BIOS and press **F6** to load optimized defaults.
- Short the **Clear CMOS** jumper on the motherboard.

*Be sure the computer is off before clearing CMOS data. Please refer to the **Clear CMOS** jumper section for resetting BIOS.*

## Updating BIOS

### Updating BIOS with M-FLASH

Before updating:

Please download the latest BIOS file that matches your motherboard model from MSI website. And then save the BIOS file into the USB flash drive.

Updating BIOS:

1. Press Del key to enter the BIOS Setup during POST.
2. Insert the USB flash drive that contains the update file into the computer.
3. Select the **M-FLASH** tab and click on **Yes** to reboot the system and enter the flash mode.
4. Select a BIOS file to perform the BIOS update process.
5. After the flashing process is 100% completed, the system will reboot automatically.

### Updating the BIOS with Live Update 6

Before updating:

Make sure the LAN driver is already installed and the Internet connection is set properly.

Updating BIOS:

1. Install and launch MSI LIVE UPDATE 6.
2. Select **BIOS Update**.
3. Click on **Scan** button.
4. Click on **Download** icon to download and install the latest BIOS file.
5. Click **Next** and choose **In Windows mode**. And then click **Next** and **Start** to start updating BIOS.
6. After the flashing process is 100% completed, the system will restart automatically.

## Updating BIOS with Flash BIOS Button

1. Please download the latest BIOS file that matches your motherboard model from the MSI® website.
2. Rename the BIOS file to **MSI.ROM**, and save it to the root of your USB flash drive (FAT32 format).
3. Connect the power supply to **CPU\_PWR1** and **ATX\_PWR1**. (No need to install CPU and memory.)
4. Plug the USB flash drive that contains the MSI.ROM file into the **Flash BIOS Port** on the rear I/O panel.
5. Press the **Flash BIOS Button** to flash BIOS, and the LED starts flashing.
6. The LED will be turned off when the process is completed.

### **Important**

Only the FAT32 format USB flash drive supports updating BIOS by **Flash BIOS Button**. To check your drive, go to Windows Explorer, right click on the drive icon and go to Properties.

## EZ Mode

At EZ mode, it provides the basic system information and allows you to configure the basic setting. To configure the advanced BIOS settings, please enter the Advanced Mode by pressing the **Setup Mode switch** or **F7** function key.

• **GAME BOOST switch** - click on the center button to switch **GAME BOOST** control between **software (SW)** and **hardware (HW)**. The inner circle represents the current stage of hardware **GAME BOOST** and the outer circle stands for software. You can read the CPU frequency of each **GAME BOOST** stage by clicking on the  icon at right-bottom corner.

### Important

*Please don't make any changes in OC menu and don't load defaults to keep the optimal performance and system stability after activating the **GAME BOOST** function.*

• **XMP switch** - click on the inner circle to enable/ disable the X.M.P. (Extreme Memory Profile). Switch the outer circle to select the X.M.P. profile. This switch will only be available if the X.M.P. supported memory module is installed.

• **Setup Mode switch** - press this tab or the **F7** key to switch between Advanced mode and EZ mode.

• **Screenshot** - click on this tab or the **F12** key to take a screenshot and save it to USB flash drive (FAT/ FAT32 format only).

• **Search** - click on this tab or the **Ctrl+F** keys and the search page will show. It allows you to search by BIOS item name, enter the item name to find the item listing. Move the mouse over a blank space and right click the mouse to exit search page.

### Important

*In search page, only the F6, F10 and F12 function keys are available.*

• **Language** - allows you to select the language of BIOS setup.

• **System information** - shows the CPU/ DDR speed, CPU/ MB temperature, MB/ CPU type, memory size, CPU/ DDR voltage, BIOS version and build date.

• **Boot device priority bar** - you can move the device icons to change the boot priority. The boot priority from high to low is left to right.

• **Information display** - click on the **CPU, Memory, Storage, Fan Info** and **Help** buttons on left side to display related information.

• **Function buttons** - enable or disable the **LAN Option ROM, M.2 Genie, Hardcore Mode, AHCI, RAID, CPU Fan Fail Warning Control** and **BIOS Log Review** by clicking on their respective button.

- **Hardcore Mode** - always keep the CPU in full speed mode to maximize system performance. This feature will increase power consumption.

• **M-Flash** - click on this button to display the **M-Flash** menu that provides the way to update BIOS with a USB flash drive.

• **Hardware Monitor** - click on this button to display the **Hardware Monitor** menu that allows you to manually control the fan speed by percentage.

• **Favorites** - press the **Favorites** tab or the **F3** key to enter **Favorites** menu. It allows you to create personal BIOS menu where you can save and access favorite/ frequently-used BIOS setting items.

- **Default HomePage** - allows you to select a BIOS menu (e.g. SETTINGS, OC...,etc) as the BIOS home page.

- **Favorite1~5** - allows you to add the frequently-used/ favorite BIOS setting items in one page.

- **To add a BIOS item to a favorite page (Favorite 1~5)**

1. Move the mouse over a BIOS item not only on BIOS menu but also on search page.
2. Right-click or press **F2** key.
3. Choose a favorite page and click on **OK**.

- **To delete a BIOS item from favorite page**

1. Move the mouse over a BIOS item on favorite page (Favorite 1~5)
2. Right-click or press **F2** key.
3. Choose **Delete** and click on **OK**.

## Advanced Mode

Press **Setup Mode switch** or **F7** function key can switch between EZ Mode and Advanced Mode in BIOS setup.

- **GAME BOOST switch/ XMP switch/ Setup Mode switch/ Screenshot/ Favorites/ Language/ System information/ Boot device priority bar** - please refer to the descriptions of EZ Mode Overview section.
- **BIOS menu selection** - the following options are available:
  - **SETTINGS** - allows you to specify the parameters for chipset and boot devices.
  - **OC** - allows you to adjust the frequency and voltage. Increasing the frequency may get better performance.
  - **M-FLASH** - provides the way to update BIOS with a USB flash drive.
  - **OC PROFILE** - allows you to manage overclocking profiles.
  - **HARDWARE MONITOR** - allows you to set the speeds of fans and monitor voltages of system.
  - **BOARD EXPLORER** - provides the information of installed devices on this motherboard.
- **Menu display** - provides BIOS setting items and information to be configured.

# SETTINGS

## System Status

### ► System Date

Sets the system date. Use tab key to switch between date elements.

The format is <day> <month> <date> <year>.

- <day> Day of the week, from Sun to Sat, determined by BIOS. Read-only.
- <month> The month from Jan. through Dec.
- <date> The date from 1 to 31 can be keyed by numeric function keys.
- <year> The year can be adjusted by users.

### ► System Time

Sets the system time. Use tab key to switch between time elements.

The time format is <hour> <minute> <second>.

### ► SATA PortX

Shows the information of connected SATA devices.

### **Important**

*If the connected SATA device is not displayed, turn off computer and re-check SATA cable and power cable connections of the device and motherboard.*

### ► System Information

Shows detailed system information, including CPU type, BIOS version, and Memory (read only).

### ► DMI Information

Shows system information, desktop Board Information and chassis Information. (Read only).

## Advanced

### ► PCI Subsystem Settings

Sets PCI, PCI express interface protocol and latency timer. Press **Enter** to enter the sub-menu.

#### ► Above 4G memory/ Crypto Currency mining [Disabled]

Enables or disables 64-bit capable devices to be decoded in above 4G address space. It is only available if the system supports 64-bit PCI decoding.

[Enabled] Allows you to utilize more than 4x GPUs.

[Disabled] Disables this function.

#### ► ACPI Settings

Sets ACPI parameters of onboard power LED behaviors. Press **Enter** to enter the sub-menu.

##### ► Power LED [Blinking]

Sets shining behaviors of the onboard Power LED.

[Dual Color] The power LED turns to another color to indicate the S3 state.

[Blinking] The power LED blinks to indicate the S3 state.

#### ► Integrated Peripherals

Sets integrated peripherals' parameters, such as LAN, HDD, USB and audio. Press **Enter** to enter the sub-menu.

##### ► Onboard LAN Controller [Enabled]

Enables or disables the onboard LAN controller.

##### ► LAN Option ROM [Disabled]

Enables or disables the legacy network Boot Option ROM for detailed settings. This item will appear when **Onboard LAN Controller** is enabled.

[Enabled] Enables the onboard LAN Boot ROM.

[Disabled] Disables the onboard LAN Boot ROM.

##### ► Network Stack [Disabled]

Sets UEFI network stack for optimizing IPv4 / IPv6 function. This item is available when Onboard LAN Controller is Enabled.

[Enabled] Enables UEFI network stack.

[Disabled] Disables UEFI network stack.

##### ► Ipv4 PXE Support [Enabled]

When **Enabled**, the system UEFI network stack will support Ipv4 protocol. This item will appear when **Network Stack** is Enabled.

[Enabled] Enables the Ipv4 PXE boot support.

[Disabled] Disables the Ipv4 PXE boot support.

##### ► Ipv6 PXE Support [Enabled]

When **Enabled**, the system UEFI network stack will support Ipv6 protocol. This item will appear when **Network Stack** is enabled.

[Enabled] Enables the Ipv6 PXE boot support.

[Disabled] Disables the Ipv6 PXE boot support.

### ► **SATA Mode [AHCI Mode]**

Sets the operation mode of the onboard SATA controller.

[AHCI Mode] Specify the AHCI mode for SATA storage devices. AHCI (Advanced Host Controller Interface) offers some advanced features to enhance the speed and performance of SATA storage device, such as Native Command Queuing (NCQ) and hot-plugging.

[RAID Mode] Enables RAID function for SATA storage devices.

### ► **SATAx Hot Plug [Disabled]**

Allows user to enable or disable the SATA hot plug support.

[Enabled] Enables hot plug support for the SATA ports.

[Disabled] Disables hot plug support for the SATA ports.

### ► **HD Audio Controller [Enabled]**

Enables or disables the onboard High Definition Audio controller.

## ► **USB Configuration**

Sets the onboard USB controller and device function. Press **Enter** to enter the sub-menu.

### ► **XHCI Hand-off [Enabled]**

Enables or disables XHCI hand-off support.

[Enabled] Enables this item when installing the operating system which does not support USB 3.0.

[Disabled] Disables XHCI hand-off support.

### ► **Legacy USB Support [Enabled]**

Sets Legacy USB function support.

[Auto] The system will automatically detect if any USB device is connected and enable the legacy USB support.

[Enabled] Enable the USB support under legacy mode.

[Disabled] The USB devices will be unavailable under legacy mode.

## ► **Power Management Setup**

Sets system Power Management of ErP Ready and AC Power Loss behaviors. Press **Enter** to enter the sub-menu.

### ► **ErP Ready [Disabled]**

Enables or disables the system power consumption according to ErP regulation.

[Enabled] Optimize the system power consumption according to ErP regulation. It will not support S4 & S5 wake up by USB and PCIe devices.

[Disabled] Disables this function.

### ► **Restore after AC Power Loss [Power Off]**

Sets the system behaviors while encountering the AC power loss.

[Power Off] Leaves the system in power off state after restoring AC power.

[Power On] Boot up the system after restoring AC power.

[Last State] Restores the system to the previous state (power on/ power off) before AC power loss.

► **System Power Fault Protection [Disabled]**

Enables or disables the system to boot up when detecting abnormal voltage input.

[Enabled] Protect the system from unexpected power operating and remain the shut down status.

[Disabled] Disables this function.

► **Windows OS Configuration**

Sets Windows detailed configuration and behaviors. Press **Enter** to enter the sub-menu.

► **Windows 10 WHQL Support [Disabled]**

Enables the supports for Windows 10 or disables for other operating systems. Before enabling this item, make sure all installed devices & utilities (hardware & software) should meet the Windows 10 requirements.

[Enabled] The system will switch to UEFI mode to meet the Windows requirement.

[Disabled] Disables this function.

► **Secure Boot**

Sets the Windows secure boot to prevent the unauthorized accessing. Press **Enter** to enter the sub-menu. This sub-menu will appear when **Windows 10 WHQL Support** is enabled.

► **Wake Up Event Setup**

Sets system wake up behaviors for different sleep modes. Press **Enter** to enter the sub-menu.

► **Wake Up Event By [BIOS]**

Selects the wake up event by BIOS or operating system.

[BIOS] Activates the following items, set wake up events of these items.

[OS] The wake up events will be defined by OS.

► **Resume By RTC Alarm [Disabled]**

Disables or enables the system wake up by RTC Alarm.

[Enabled] Enables the system to boot up on a scheduled time/ date.

[Disabled] Disables this function.

► **Date (of month) Alarm/ Time (hh:mm:ss) Alarm**

Sets RTC alarm date/ Time. If Resume By RTC Alarm is set to [Enabled], the system will automatically resume (boot up) on a specified date/hour/minute/second in these fields (using the + and - keys to select the date & time settings).

► **Resume By PCI-E Device [Disabled]**

Enables or disables the wake up function of installed PCI-E expansion cards, integrated LAN controllers or USB devices which are supported by third party integrated chips.

[Enabled] Enables the system to be awakened from the power saving modes when activity or input signal of PCIe device is detected.

[Disabled] Disables this function.

► **Resume by USB Device [Disabled]**

Disables or enables system wake up from S3/S4 by USB device.

[Enabled] Enables the system to be awakened from sleep state when activity of USB device is detected.

[Disabled] Disables this function.

► **Resume From S3/S4/S5 by PS/2 Mouse [Disabled]**

Enables or disables the system wake up by PS/2 mouse.

[Enabled] Enables the system to be awakened from S3/ S4/ S5 state when activity of PS/2 mouse is detected.

[Disabled] Disables this function.

► **Resume From S3/S4/S5 by PS/2 Keyboard [Disabled]**

Enables or disables the system wake up by PS/2 keyboard.

[Any Key] Enables the system to be awakened from S3/ S4/ S5 state when activity of any key on PS/2 keyboard is detected.

[Hot Key] Enables the system to be awakened from S3/ S4/ S5 state when activity of hot key on PS/2 keyboard is detected.

[Disabled] Disables this function.

► **Hot Key [Ctrl+Space]**

Selects a combination of keys as a hot key to wake the system. This item appears when you set the **Resume From S3/S4/S5 by PS/2 Keyboard** to **Hot Key**.

► **Secure Erase+**

Enables or disables Secure Erase+ function. **Secure Erase+** is the best way to effectively wipe all data from a SSD. Please note that data of SSD will be erased after enabling **Secure Erase+**.

► **Intel ( R ) I211 Gigabit**

Shows driver information and configuration of the Ethernet controller parameter.

## Boot

Sets the sequence of system boot devices.

► **Full Screen Logo Display [Enabled]**

Enables or disables to show the full screen logo while system POST.

[Enabled] Shows the logo in full screen.

[Disabled] Shows the POST messages.

► **Bootup NumLock State [On]**

Select the keyboard NumLock state upon bootup.

► **Info Block effect [Unlock]**

Sets the state of **Help** information block.

[Unlock] Sliding effect.

[Lock] Fix the **Help** information block on the screen.

### ► AUTO CLR\_CMOS [Disabled]

Enables or disables the CMOS data to be resumed automatically when the system cannot boot to OS and reboot repeatedly.

### ► Boot Mode Select [LEGACY+UEFI]

Sets the system boot mode from legacy or UEFI architecture depending on OS installation requirement. This item will become un-selectable and will be configured automatically by BIOS when **Windows 10 WHQL Support** is enabled.

[UEFI] Enables UEFI BIOS boot mode support only.

[LEGACY+UEFI] Enables both Legacy BIOS boot mode and UEFI BIOS boot mode.

### ► FIXED BOOT ORDER Priorities

Sets device priority for system boot.

### ► Boot Option Priorities

These items are used to prioritize the installed boot devices.

## Security

### ► Administrator Password

Sets administrator password for system security. User has full rights to change the BIOS items with administrator password. After setting the administrator password, the state of this item will show **Installed**.

### ► User Password

Sets User Password for system security. User has limited rights to change the BIOS items with user password. This item will be available when administrator password is set. After setting the user password, the state of this item will show **Installed**.

### ► Password Check [Setup]

Selects a condition that will request the password.

[Setup] A password will be requested for entering the BIOS Setup.

[Boot] A password will be requested for booting the system.

### ► Password Clear [Enabled]

Enables or disables the clear CMOS behavior to clear a set password.

[Enabled] The password will be erased after clear CMOS.

[Disabled] The password will always be kept.

### **Important**

*When selecting the Administrator / User Password items, a password box will appear on the screen. Type the password then press **Enter**. The password typed now will replace any previous set password from CMOS memory. You will be prompted to confirm the password. You may also press **Esc** key to abort the selection.*

*To clear a set password, press **Enter** when you are prompted to enter a new password. A message will confirm the password is being disabled. Once the password is disabled, you can enter the setup and OS without authorization.*

### ► **Trusted Computing**

Sets TPM (Trusted Platform Module) function.

#### ► **Security Device Support [Disabled]**

Enables or disables the TPM function to build the endorsement key for accessing the system.

#### ► **AMD fTPM switch [AMD CPU fTPM]**

Selects TPM device.

[AMD CPU fTPM]                      Select it for AMD Firmware TPM.

[AMD CPU fTPM Disabled]      Select it for Discrete TPM.

#### ► **Device Select [Auto]**

Sets the version of the TPM device. The version must be identical with the device. Sets to **Auto**, system will detect the TPM2.0 or TPM1.2 model automatically.

### ► **Chassis Intrusion Configuration**

Press **Enter** to enter the sub-menu.

#### ► **Chassis Intrusion [Disabled]**

Enables or disables recording messages while the chassis is opened. This function is ready for the chassis equips a chassis intrusion switch.

[Enabled]              Once the chassis is opened, the system will record and issue a warning message.

[Reset]                Clear the warning message. After clearing the message, please return to **Enabled** or **Disabled**.

[Disabled]            Disables this function.

## **Save & Exit**

### ► **Discard Changes and Exit**

Exit BIOS setup without saving any change.

### ► **Save Changes and Reboot**

Save all changes and reboot the system.

### ► **Save Changes**

Save current changes.

### ► **Discard Changes**

Discard all changes and restore to the previous values.

### ► **Restore Defaults**

Restore or load all default values.

### ► **Boot Override**

The installed boot-able devices will appear on this menu, you can select one of them to be the boot device.

## OC

### **Important**

- Overclocking your PC manually is only recommended for advanced users.
- Overclocking is not guaranteed, and if done improperly, it could void your warranty or severely damage your hardware.
- If you are unfamiliar with overclocking, we advise you to use **GAME BOOST** function for easy overclocking.

#### ► **OC Explore Mode [Normal]**

Enables or disables to show the normal or expert version of OC settings.

[Normal] Provides the regular OC settings in BIOS setup.

[Expert] Provides the advanced OC settings for OC expert to configure in BIOS setup.

Note: We use \* as the symbol for the OC settings of Expert mode.

#### ► **CPU Ratio [Auto]**

Sets the CPU ratio that is used to determine CPU clock speed. This item can only be changed if the processor supports this function.

#### ► **Core Performance Boost [Auto]**

Enables or disables the Core Performance Boost (CPB). This item appears when the installed CPU supports this function.

#### ► **Downcore Control [Auto] (optional)**

Sets the number of processor cores to be used. This item appears when the installed CPU supports this function.

#### ► **Game Boost Function Control [By Onboard Button]**

Enables the GAME BOOST function by virtual button in BIOS or physical button on motherboard. Enabling GAME BOOST function can automatically overclock the system with MSI optimized overclocking profile.

#### ► **A-XMP [Disabled]**

Please enable A-XMP or select a profile of memory module for overclocking the memory. This item will be available when the installed memory modules, processor and motherboard support this function.

### ► DRAM Frequency [Auto]

Sets the DRAM frequency. Please note the overclocking behavior is not guaranteed.

### ► Memory Try It ! [Disabled]

It can improve memory compatibility or performance by choosing optimized memory preset.

### ► Advanced DRAM Configuration (optional)

Press Enter to enter the sub-menu. User can set the memory timing for each/ all memory channel. The system may become unstable or unbootable after changing memory timing. If it occurs, please clear the CMOS data and restore the default settings. (Refer to the Clear CMOS jumper/ button (optional) section to clear the CMOS data, and enter the BIOS to load the default settings.)

### ► DigitALL Power

Press **Enter** to enter the sub-menu. Controls the digital powers related to CPU PWM.

#### ► CPU Loadline Calibration Control [Auto]

The CPU voltage will decrease proportionally according to CPU loading. Higher load-line calibration could get higher voltage and good overclocking performance, but increase the temperature of the CPU and VRM. If set to **Auto**, BIOS will configure this setting automatically.

#### ► CPU VRM Over Temperature Protection [Auto]

Sets the temperature limit on CPU VRM for over-temperature protection. The CPU frequency may be throttled when CPU temperature over the specified temperature. If set to **Auto**, BIOS will configure this settings.

#### ► VR 12VIN OCP Expander [Auto]

Expands the limitation of VR Over Current Protection with 12V input voltage. The higher expanding value indicates less protection. Therefore, please adjust the current carefully if needed, or it may damage the CPU/ VR MOS. If set to "Auto", BIOS will configure this setting automatically.

#### ► DRAM CH\_A/B / CH\_C/D Phase Control [Auto]

Controls memory PWM phase according to the DRAM loading. If set to **Auto**, BIOS will optimize the DRAM PWM phase automatically.

[Auto] This setting will be configured automatically by BIOS.

[Optimized] Sets the optimum PWM phase profile.

[Disabled] Disables the PWM phase switching feature.

#### ► DRAM CH\_A/B / CH\_C/D Over Current Protection [Auto]

Sets the current limit for DRAM over-current protection. If set to **Auto**, BIOS will configure this setting automatically.

[Auto] This setting will be configured automatically by BIOS.

[Enhanced] Extends the current range for over-current protection.

#### ► DRAM CH\_A/B / CH\_C/D Switching Frequency [Auto]

Sets the PWM working speed to stabilize DRAM voltage and minimize ripple range. Increasing the PWM working speed will cause higher temperature of MOSFET.

So please make sure a cooling solution is well-prepared for MOSFET before you increase the value. If set to "**Auto**", BIOS will configure this setting automatically.

#### ► DRAM CH\_A/B / CH\_C/D VRM Over Temperature Protection [Auto]

Sets the temperature limit on DRAM VRM for over-temperature protection. The DRAM frequency may be throttled when VRM temperature over the specified value. If set to **Auto**, BIOS will configure this settings.

#### ► CPU Voltages control [Auto]

These options allows you to set the voltages related to CPU. If set to **Auto**, BIOS will set these voltages automatically or you can set it manually.

#### ► DRAM Voltages control [Auto]

These options allows you to set the voltages related to memory. If set to **Auto**, BIOS will set these voltages automatically or you can set it manually.

#### ► PROM Voltages control [Auto]

These options allows you to set the voltages related to PROM. If set to **Auto**, BIOS will set these voltages automatically or you can set it manually.

#### ► CPU Memory Changed Detect [Enabled]\*

Enables or disables the system to issue a warning message during boot when the CPU or memory has been replaced.

[Enabled] The system will issue a warning message during boot and then you have to load the default settings for new devices.

[Disabled] Disables this function and keeps the current BIOS settings.

#### ► CPU Specifications

Press **Enter** to enter the sub-menu. This sub-menu displays the information of installed CPU. You can also access this information menu at any time by pressing [F4]. Read only.

#### ► CPU Technology Support

Press **Enter** to enter the sub-menu. The sub-menu shows the key features of installed CPU. Read only.

#### ► MEMORY-Z

Press **Enter** to enter the sub-menu. This sub-menu displays all the settings and timings of installed memory. You can also access this information menu at any time by pressing [F5].

#### ► DIMMx Memory SPD

Press **Enter** to enter the sub-menu. The sub-menu displays the information of installed memory. Read only.

#### ► CPU Features

Press **Enter** to enter the sub-menu.

#### ► SMT Mode [Auto]

Enables/ disables the AMD Simultaneous Multi-Threading. This item appears when the installed CPU supports this technology.

#### ► Global C-state Control [Auto]

Enables/ disables IO based C-state generation and DF C-states.

► **Opcache Control [Auto]**

Enables/ disables Opcache.

► **IOMMU Mode [Auto]**

Enables/disables the IOMMU (I/O Memory Management Unit) for I/O Virtualization.

► **Spread Spectrum [Auto]**

This function reduces the EMI (Electromagnetic Interference) generated by modulating clock generator pulses.

[Enabled] Enables the spread spectrum function to reduce the EMI (Electromagnetic Interference) problem.

[Disabled] Enhances the overclocking ability of CPU Base clock.

**Important**

- *If you do not have any EMI problem, leave the setting at [Disabled] for optimal system stability and performance. But if you are plagued by EMI, select the value of Spread Spectrum for EMI reduction.*
- *The greater the Spread Spectrum value is, the greater the EMI is reduced, and the system will become less stable. For the most suitable Spread Spectrum value, please consult your local EMI regulation.*
- *Remember to disable Spread Spectrum if you are overclocking because even a slight jitter can introduce a temporary boost in clock speed which may just cause your overclocked processor to lock up.*

► **Relaxed EDC throttling [Auto]**

[Auto] AMD's recommendation

[Enabled] Reduce the amount of time the processor will throttle.

[Disabled] Part-specific EDC throttling protection enabled.

► **AMD Cool' n' Quiet [Enabled]**

The Cool' n' Quiet technology can effectively and dynamically lower CPU speed and power consumption.

► **SVM Mode [Enabled]**

Enables/ disables the AMD SVM (Secure Virtual Machine) Mode.

## M-FLASH

M-FLASH provides the way to update BIOS with a USB flash drive. Please download the latest BIOS file that matches your motherboard model from MSI website, save the BIOS file into your USB flash drive. And then follow the steps below to update BIOS.

1. Insert the USB flash drive that contains the update file into the computer.
2. Click on **M-FLASH** tab, a demand message will be prompted. Click on **Yes** to reboot and enter the flash mode.

3. The system will enter the flash mode and a file selection menu will appear after rebooting.

4. Select the BIOS file.
5. A message will prompt you to toggle the Multi BIOS switch to the target BIOS ROM, and then click **OK** to perform the BIOS update process.

6. After the flashing process is 100% completed, the system will reboot automatically.

## OC PROFILE

### ► Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6 management. Press <Enter> to enter the sub-menu.

#### ► Set Name for Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Name the current overlocking profile.

#### ► Save Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Save the current overlocking profile.

#### ► Load Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Load the current overlocking profile.

#### ► Clear Overclocking Profile 1/ 2/ 3/ 4/ 5/ 6

Clear the current overlocking profile.

### ► OC Profile Load from ROM

Load OC profile from BIOS ROM.

### ► OC Profile Save to USB

Save OC profile to the USB flash drive. The USB flash drive should be FAT/ FAT32 format only.

### ► OC Profile Load from USB

Load OC profile from the USB flash drive. The USB flash drive should be FAT/ FAT32 format only.

# Software Description

## Installing Windows® 10

1. Power on the computer.
2. Insert the Windows® 10 disc into your optical drive.
3. Press the **Restart** button on the computer case.
4. Press **F11** key during the computer POST (Power-On Self Test) to get into Boot Menu.
5. Select your optical drive from the Boot Menu.
6. Press any key when screen shows **Press any key to boot from CD or DVD...** message.
7. Follow the instructions on the screen to install Windows® 10.

## Installing Drivers

1. Start up your computer in Windows® 10.
2. Insert MSI® Driver Disc into your optical drive.
3. The installer will automatically appear and it will find and list all necessary drivers.
4. Click **Install** button.
5. The software installation will then be in progress, after it has finished it will prompt you to restart.
6. Click **OK** button to finish.
7. Restart your computer.

## Installing Utilities

Before you install utilities, you must complete drivers installation.

1. Insert MSI® Driver Disc into your optical drive.
2. The installer will automatically appear.
3. Click **Utilities** tab.
4. Select the utilities you want to install.
5. Click **Install** button.
6. The utilities installation will then be in progress, after it has finished it will prompt you to restart.
7. Click **OK** button to finish.
8. Restart your computer.

## APP MANAGER

APP MANAGER is a handy management application for integration of MSI applications and software interface. Providing easy shortcut entrance and real-time update information of all the MSI software and applications.

- **APP list** - shows all the applications and software be supported by this motherboard. An icon represents a entrance to the application rather than the application itself.
  - **Colorful icon** - a colorful icon means that the application had have been installed successfully and is available. Double click on desired icon to access the application. A refresh icon  shows to inform you that the application has a update version.
  - **Gray icon** - the icon with gray painting means that the application is not available and you have to install it if needed. Double click on the gray icon and the update information will show. Click on the **INSTALL** button to install the application.
- **Motherboard Information** - shows the model name of motherboard.
- **Total Install/ Update** - click on this tab to update/ install all the applications.

### **Important**

Please note that, once you uninstall the APP MANAGER, all the MSI applications and software will be uninstalled simultaneously.

## LIVE UPDATE 6

LIVE UPDATE 6 is an application for the MSI® system to scan and download the latest drivers, BIOS, and utilities. With LIVE UPDATE 6, you don't need to search the drivers on websites, and don't need to know the models of motherboard and graphics cards. LIVE UPDATE 6 will download the appropriate drivers automatically.

There are **Live Update**, **History**, **Setting** and **System Information** tabs at the top. You can click the tab to switch the control panel.

- **Live Update** - When you launch LIVE UPDATE 6, you will see the Live update tab at first. This tab allows you to select files to download. You can also read the relevant information by clicking the information icon  on the right of the item listed.
- **History** - shows the downloading history.
- **Setting** - allows you to specify the frequency that LIVE UPDATE 6 remind you to update.
- **System Information** - displays the information of the system.
- **FAQ** - shows Frequently Asked Questions.
- **Online Help** - shows Online Help information.

### Updating The System

This section describes how to update your system with LIVE UPDATE 6. Please follow the steps below:

1. Select the **Live Update** tab.
2. Choose **Automatic scan**, system will automatically scan all the items and search for the latest update files. Or you can choose **Manual scan** and select the items you wish to scan.
3. Click the **Scan** button at the bottom. It may take several moments to complete the process.
4. When the download list appears, please select the items you intend to update.
5. Click **Download** button at the bottom.
6. When **Save Path** prompt, you can specify a download directory.

7. When downloading you will see the screen below. It may take several moments to complete the process.

Type	Item	Latest Ver	Size	Download
MSI utility	Fast Boot	1.0.1.5	1.52 MB	<div style="width: 46%;"></div> 46 %
MSI utility	Super Charger	1.2.0.6	3.21 MB	

8. To install the applications, simply unpack the packages and install.

## Total Installer

Total Installer is a convenient feature to simplify frequent installing procedure. To use Total Installer:

1. **Scan** updates in **Live Update** tab.
2. Check the **Select All** check-box you intend to update.
3. Click the **Total Installer** button. LIVE UPDATE 6 will automatically install them.
4. When prompted, click **OK** to complete the Total Installer procedure
5. Reboot your system.

# COMMAND CENTER

COMMAND CENTER is an user-friendly software and exclusively developed by MSI, helping users to adjust system settings and monitor status under OS. With the help of COMMAND CENTER, making it possible to achieve easier and efficient monitoring process and adjustments than that under BIOS. In addition, the COMMAND CENTER can be a server for mobile remote control application.

## Profile Buttons

- **Default** - load the default values for the current feature.
- **Apply** - apply your changes.
- **Save** - store values in the file with individual file extension.
- **Load** - load the values from the file.

### **Important**

Every time you shut down the system, the configured setting will be restored to the factory default. If you want to use the saved settings, you have to load it every time by clicking the **Load** and **Apply** buttons.

## CPU Frequency

CPU Frequency control panel allows you to change CPU Ratio and Base clock. You can see the current frequency of each CPU core on the top of the panel.

## CPU Fan

CPU Fan control panel provides **Smart mode** and **Manual Mode**. You can switch the control mode by clicking the **Smart Mode** and **Manual Mode** buttons on the top of the CPU Fan control panel.

- **Manual Mode** - allows you to manually control the CPU fan speed by percentage.
- **Smart Mode** - a linear fan speed control feature. The control panel contains 4 dots allows you to drag and adjust the Smart Speed slopes. The fan speed will be changed along these lines with CPU temperature. The white dot will create strip chart in real time.
- **System Fan Button** - to open the system fan control panel in new window.
- **Fan Tune Button** - to automatically optimize the smart fan setting.

Manual Mode

Smart Mode

## CPU Voltage

CPU Voltage control panel allows you to control the CPU voltage.

## DRAM Frequency & DRAM Voltage

- **DRAM Frequency** - Shows the DRAM clock, ratio and frequency.
- **DRAM Voltage** - Allows you to adjust the DRAM voltage. The risky values are displayed in red.

## IGP Frequency & GT Voltage

- **IGP Frequency** - Allows you to adjust the IGP ratio, and shows the IGP clock, ratio and frequency.
- **GT Voltage** - Allows you to adjust the GT voltage. The risky values are displayed in red.

## GAME BOOST

GAME BOOST has 8 overclocking stages for you to overclock your computer. COMMAND CENTER provides the software interface instead of GAME BOOST knob on the motherboard. You can click on the center button to switch GAME BOOST control between software (SW) and hardware (HW). The inner circle represents the current stage of hardware GAME BOOST and the outer represents software.

### Option Buttons - Advanced

When click the **Advanced** button, The **Voltage**, **Fan** and **DRAM** icons will appear.

- **Voltage** - allows you to adjust advanced voltage values of CPU and chipset.
- **Fan** - allows you to control the system fans speed.
- **DRAM** - shows the current Advanced DRAM parameters, and allows you to change the settings by selecting values from the drop-down menu on the right hand side.
- **Sensor** - allows you to monitor your motherboard temperature and fan speed with the virtual thermal image. You can drag and drop the fan icons to new locations. When you press the **Cooling** button, all fans will run at full speed.

### Option Buttons - Setting

When click the **Setting** button, The **Record**, **Warning** and **Mobile Control** icons will appear.

- **Record** - allows you to monitor the status of voltage, fan speed and temperature in real time.
  - To filter record charts, select the check box next to the items.
  - When click the **Play** button, the chart pane will start to show the recording chart. If you want to check the value of a specific spot on chart, please move the orange vertical line to the spot.
  - History Record stores the data and names with date and time.
  - To make a history record: Select items and click the **Record** button. When finished, click the **Record** button again. The data will be stored in the drop-down menu.
  - To load a record, click the drop-down menu and select one from the list.
  - To delete a record, select the record that you want to delete, and click the **Trash Can** icon.

• **Warning** - contains fields of voltage, fan speed and temperature for you to set the threshold values. When system detects the status over your settings, a warning message will pop-up.

• **Mobile Control** - is only available for the motherboard with the built-in WiFi module. It allows you to enable/disable the COMMAND CENTER Remote Server. Please refer to the instruction on the Mobile Control control panel.

• **To start remote control: (optional)**

1. Download and install **MSI® COMMAND CENTER APP** to your mobile device.
2. Enable **COMMAND CENTER Remote Server** on the **Mobile Control** panel.
3. Enable **SoftAP Management**.
4. Enter **SSID** and **Password**, and then click the **Apply** button.
5. Activate Wi-Fi® on your mobile device and connect to SoftAP with the SSID.
6. Run **MSI® COMMAND CENTER APP** on your mobile device.
7. Find the IP address on the **SoftAP Management Setting** area, and enter the IP address on your **MSI® COMMAND CENTER APP** to link your system.
8. Press **Refresh** on the **MSI® COMMAND CENTER APP** to verify that monitoring and OC functions are working properly.

**Option Buttons - Information**

When click the **Information** button, The **Motherboard**, **CPU**, **Memory** and **HW monitor** icons will appear.

You can click the icons to open the related information.

**Gadget Mode**

COMMAND CENTER provides a gadget mode to monitor the system status. You can switch between gadget mode and full mode by clicking the arrow icon  on the top left.

• **To arrange gadgets:**

1. Click the Spanner icon  on the Gadget mode, a configuration panel will slide out.
2. Select the check box next to the items.
3. Click the **Close** button.

## GAMING APP

GAMING APP is an application designed to quickly control your system for improving gaming performance.

- **Setting Button** - allows you to choose running GAMING APP when Windows starts or let GAMING APP to overwrite the VGA fan control function.
- **Information Button** - shows the information of this application.
- **CPU Frequency** - shows the current CPU frequency.
- **GPU Frequency** - shows the current GPU frequency.
- **Control Mode Buttons**
  - **OC Mode** - apply turbo frequency to CPU and OC frequency to GPU.
  - **Gaming Mode** - automatically optimize the CPU ratio and the GPU clock.
  - **Silent Mode** - reverts the CPU ratio and GPU clock to the default values.
- **Gaming Function Buttons** - allows you to use **LED Effect**, **OSD**, **Eye Rest** and **Dragon Eye** functions.
- **Peripheral Device Function Buttons** - allows you to set the **Gaming Hotkey**, **Mouse Master** and **VR Ready** functions.
- **Remote Control Setting Button** - available for the motherboards with built-in or discrete WiFi module. It allows you to set up **Name** and **Password** to link the android device and the motherboard. Please follow the steps below to complete the remote control setting.
  1. Download and install the **MSI® GAMING APP** APP to your android device.
  2. Set up a set of **Name** and **Password** on the **Remote Control Setting** panel, and then click the **Apply** button.
  3. Connect your android device and motherboard to the same local area network.
  4. Run **MSI® GAMING APP** APP on your android device.
  5. Press the **Remote Control Setting** icon on the **MSI® GAMING APP** APP to find the paired device **Name** you set in the **Remote Control Setting** panel.
  6. Enter the **Password** you set in the **Remote Control Setting** panel.
  7. Finally, you can use the **MSI® GAMING APP** APP to control your motherboard with the android device.

## OSD Setting Panel

Use the OSD setting panel to specify information within on-screen display (OSD).

- **Apply Button** - applies above settings to OSD.

## Eye Rest

Eye Rest allows you to optimize the display on your monitor.

- **EyeRest** - reduces blue-light of your LED backlit screen, in order to protect your eyes.
- **Gaming** - automatically increase contrast ratio of your screen.
- **Movie** - automatically increase dynamic contrast ratio of your screen.
- **Customize** - allows you to adjust gamma, contrast and color balance for your screen.
- **Default** - loads the default settings.

## VR Ready

It will optimize the performance of your system to ensure everything is VR Ready.

- **VR ON/ OFF** -enables or disables VR settings.
- **Applications** - appears when you turn on the VR support. It allows you to close some applications to optimize the system for better VR experience.

## Gaming Hotkey

Gaming Hotkey provides instant control of the system through user defined hotkeys.

- **Gaming Hotkey ON/OFF** - allows you to turn ON/OFF the Gaming Hotkey function.
- **Categories Toggle** - allows you to toggle over the Hotkey categories.
  - **Macro Genie** - provides the keyboard and mouse macro record function and allows you to define the hotkeys for the macro recorder.
    1. Click on the **Record** button to start the keyboard and mouse macro recorder.
    2. Click on the **Stop** button to stop the recorder.
    3. Key-in a file name and set-up the parameter for the macro.
    4. Finally, click on the **Save** button to save the recorded macro.
  - **Windows Keys** - allows you to define hotkeys to replace Windows default keyboard shortcuts.
  - **Login Keys** - provides hotkey login function.
  - **MSI Smart Keys** - allows you to define hotkeys for MSI Smart Keys.
- **Hotkey Manager** - allows you to create, edit and delete hotkeys.
- **Current Hotkeys** - shows all existing hotkeys.

### **Important**

- The **Caps Lock**, **Num Lock**, **Scroll Lock**, **Window Home**, **Application** and **BackSpace** keys can not be used as Hotkeys.
- Some key combinations are reserved for use by Microsoft Windows and can not be assigned as a hotkey.

## Mouse Master

Mouse Master provides mouse macro function. You can also use it to change DPI of your mouse.

- **Delay Time** - allows you to apply a delay time in mouse macro.
- **Macro Hot Key** - allows you to assign a hotkey from A to Z to activate the macro.
- **Mouse Action** - assigns mouse actions to the macro.
  - **New** - captures the mouse coordinate and add to the macro.
  - **Left** - add a left-click to the macro.
  - **Middle** - add a middle-click to the macro.
  - **Left** - add a left-click to the macro.
- **Action List** - shows the actions of the current macro.
- **Edit Buttons** - there 3 buttons for editing the macro.
  - **Run** - activates the macro.
  - **Delete** - removes the selected action from the macro.
  - **Clear** - removes all actions from the macro.
- **Load Button** - allows you to load a macro.
- **Save Button** - allows you to save the macro to a file.
- **DPI Setting** - allows you select the mouse DPI from the drop-down menu.
- **Default Button** - reverts to the default DPI setting.
- **DPI Hot Key** - allows you to assign a hotkey from A to Z to activate the DPI setting. Please note that you muse hold the hotkey to keep the DPI setting. When you release the hotkey, the DPI setting will be reverted to default.
- **Test Area** - allows you to test the mouse movement.
- **Clear Button** - clears the test area.

## X-BOOST

The MSI **X-BOOST** allows you to select the system performance mode to meet your current system environment or support faster storage access speed for your external storage or memory cards.

### Easy

In **Easy** page, you can select one system performance mode to meet the current system environment.

- **Performance mode** - moves over the mouse to any one of performance mode and click on the **ON** button to enable it.

### **Important**

The **Customize** mode is the default of system performance.

- **Performance information** - displays the system performance diagram of enabled mode.
- **Setting** - enables or disables **Run X-BOOST when windows starts**.

## Advance

In **Advance** page, you can enable the **USB SPEED UP** and **STORAGE BOOST**.

- **Device information** - displays the information and current transfer rates/ access speeds of USB/ storage devices.
- **Setting** - enables or disables **Run X-BOOST when windows starts**.
- **USB SPEED UP** - supports faster data transfer rates of the USB storage devices.
- **STORAGE BOOST** - supports faster access speed of storage device.

### **Important**

- Please note that you can only select one mode at a time from **Easy** or **Advance** page as **MSI X-BOOST** function.
- The improved transfer rate/ access speed will vary with the USB/ storage device.

# MYSTICLIGHT

MYSTICLIGHT is an application allows you to control LED lights of MSI products.

## Main Screen

The Main screen is used to configure what devices need to be synchronized and LED light effect options.

- **ON/OFF ALL LED** - allows you to turn ON/ OFF all LED lights of sync devices.
- **Sync Devices** - allows you to select devices to sync by clicking the device's icon on the Sync Device bar. The lighting effect of the sync devices will be controlled by the main screen.
- **Live Preview** - gives you the full experience of your configuration's look, feel while you are editing it.
- **Light Effect Options** - allow you to customize lighting effect of the sync devices.
- **Apply Button** - applies lighting effect settings.
- **Sync Profile** - manages sets of sync device lighting effect settings.
  - **All Sync** - all devices are synchronized to the main lighting effect settings.
  - **Individual** - all devices lighting effects are applied to their respective settings.
  - **Profile01~03** - selected sync devices lighting effects are synchronized to the main lighting effect settings.
- **Save Button** - saves sync device settings and lighting effect settings to the current Sync Profile.
- **Device Setting** - switches to the other supported products.

## Motherboard Screen

The motherboard screen is used to configure the LED light effect of the motherboard.

**Note:** The motherboard picture and name may vary according to different models.

- **Return Button** - returns to the main screen.
- **ON/OFF ALL LED** - allows you to turn ON/ OFF all LED lights of the motherboard.
- **Sync All** - allows you to synchronize all LED light effect of the motherboard.
- **Motherboard Name** - shows the name of the motherboard.
- **Live Preview** - gives you the full experience of your configuration's look, feel while you are editing it.
- **Light Effect Options** - allow you to customize lighting effect of the sync devices.
- **Apply Button** - applies lighting effect settings.
- **Profile** - manages sets of motherboard LED light effect settings.
- **Save Button** - saves sync device settings and lighting effect settings to the current profile.
- **LED Area** - switches to the other LED area on the motherboard.

## MSI SMART TOOL

MSI SMART TOOL is a convenient tool that can help you to create your Windows installation USB flash drive with USB 3.0 drivers, and it can also create a software RAID.

### Main menu

After installing and activating MSI SMART TOOL, it will display a main menu for you to choose **Win7 Smart Tool** or **Software RAID**. Note that the Software RAID is only available when your system equipped with at least 3 hard-disk drives (1 system disk and 2 data disks).

### WIN7 SMART TOOL

Before you can create your Windows installation USB flash drive, you'll need to have your Windows Installation DVD or ISO file, and also have a minimum of a 8GB USB flash drive to create your installer. Be sure to backup files on the USB drive, this process will erase it.

To create the Windows installation USB drive:

#### Step1. Choose source folder

- In the **Source folder** box, type the name and path of your Windows ISO file, or click **Browse** button and select the file from the dialog box. (This option will copy all Windows installation files and USB 3.0 drivers)
- If you already have the Windows Installation USB flash drive and just want to add USB 3.0 drivers on it, you can choose **Add USB drivers**.

#### Step2. Choose Storage device

- Choose **USB storage** and select your USB flash drive in the drop-down list. In case the USB flash drive is not listed, click the **Refresh Drive** button.
- Click **Start**.

**Important**  
You can also create an installer ISO image file by selecting the **ISO destination** in Step2, and then burn it onto the DVD. However, this method does not support **M.2 Genie**.

## SOFTWARE RAID

This utility allows you to create a software RAID in Windows system.

To create a software RAID:

1. Use checkboxes to select the disks you want included in your RAID.
2. Choose **Speed Up** or **Backup** for RAID type.
  - Speed Up = RAID0
  - Backup = RAID1
3. Click **Start**.
4. When prompt **Finish!**, click **OK**.

 **Important**

*Software RAID can't include the system disk.*

# RAMDISK

RAMDISK creates a virtual RAM drive using the available memory in your computer, the performance of the RAMDISK is faster than an SSD and hard drive. RAMDISK allows you to store any temporary information on it. Furthermore, using the RAMDISK will extend your SSD's life by sparing it from excessive reading and writing.

## Creating a RAM Disk

When **RAMDISK** is started, it will create a default RAM disk. If you want to change settings, refer to following instructions.

- **Setting** - specify **Letter**, **Name**, **Size** and **Format** of the RAM disk.
- **Option** - select browser temporary files to save/load on the RAM disk. You can also add software files to improve reading speed.
- **Backup** - specify backup and restore settings to prevent data loss. All files will be lost each time the RAMDISK is stopped if you do not backup.
  - **Browse Button** - set the path to the image file.
  - **Backup Right Now Button** - manually backup files.
  - **Restore On Boot** - check this box to have the image file loaded automatically when RAMDISK starts.
  - **Auto Backup** - check this box to backup automatically over a period of time.
- **Apply Button** - allows you to apply changes.
- **Management** - shows RAMDISK information and allows you to delete files.

## GAMING LAN MANAGER

GAMING LAN MANAGER is an utility for traffic shaping for the Windows 10. It can keep your internet fast during heavy upload/ download and improve your ping for online games. If your motherboard has a Wi-Fi module, GAMING LAN MANAGER provides virtual access point function for traffic shaping for your mobile devices.

- **Applications** - displays currently using network bandwidth applications. You can prioritize Games, Medias or File sharing programs as high as possible.
- **Performance** - shows top 5 applications by total traffic, allows you to monitor network bandwidth usage.
- **Network Test** - allows you to setup bandwidth control.
- **Advanced Setting** - allows you to expand RWIN to accelerate download speed. You can also block IP address and setup virtual access point.
- **Information** - shows version information.

### Configuring Bandwidth

This section describes how to configure Internet Provider Speed. You can configure default internet upload and download bandwidth from the Network Test tab on the GAMING LAN MANAGER window.

#### **Important**

*Before using the GAMING LAN MANAGER for the first time, you should use the **Test Network Speed** button which runs a speed test of your current total Internet bandwidth delivered through your Internet service provider.*

## Speed Testing

The speed testing is used to optimize bandwidth usage. To test the Upload and Download speed, please follow the steps below:

1. Click the **Network Test** block in GAMING LAN MANAGER.

2. Click **Test Network Speed** button. The test takes several minutes to test your network speed.
3. Enter the testing results into **Upload Speed** and **Download Speed** fields.
4. Check the **Enable Bandwidth Control** to allow the GAMING LAN MANAGER to manage the bandwidth.

## DRAGON EYE

DRAGON EYE allows you to watch game guides, tutorials, live match or tournament stream while gaming. In game, you can use hotkeys to control/adjust the settings of DRAGON EYE.

- **On / Off Switch** - enables or disables Dragon Eye during your gaming sessions. Switch it on before you launch the game in order to watch video while playing.
- **Video List** - contains the videos you can select to watch. You can add videos or streams to the list by pasting their URL into the input bar and hit+.
- **Size Settings** - allows you to select the size of the Dragon Eye video content displayed on-screen when you're replaying a game. There are three options available:
  - WQVGA (Small – 400×240)
  - HVGAW (Medium – 640×360)
  - WVGA (Large – 768×480)
- **Position Settings** - allows you to determine how you want to position your DRAGON EYE windows on screen to avoid interfering your gaming experience.
- **Help** - If you want to watch the video tutorial for Dragon Eye or want to see if your game is supported, press this button and the help window will be shown.
- **Transparency Settings** - allows you to set the transparency of your Dragon Eye video.
  - 0 = opaque | 100 = transparent.
- **Hotkeys Information** - In this information section you can find the hotkeys for Dragon Eye. There are three hotkeys:
  - **Alt+F9** - switches mouse focus between video window and game itself. (Direct interface to adjust progress bar, volume and other settings of video during the game)
  - **Alt+F10** - turns on/off video window .
  - **Alt+F11** - adjusts transparency of video clip.

**NOTE:** To customize hotkey, simply select the hotkey icon and then press the keys combination you want to use as a hotkey.

## Nahimic 2

Nahimic 2 is designed to offer the best audio experience it contains 6 audio effects, 3 microphone effects, HD Audio Recorder2 and Sound Tracker.

### Installation and Update

Nahimic 2 is included in the audio driver. If you need to install it or update it, please use the **Driver Disc** with your motherboard or download the driver from MSI's official website.

### Audio Tab

From this tab, you can access all of Nahimic 2's audio effects, audio profiles and settings.

- **Display & Volume** - displays the type of audio rendering device currently being used as output, as well as its current volume.

- **Mute** - mutes the current audio output device.

- **Device properties** - allows you to change the format, sample rate, bit rate and the channel gain of the current device (if these options are available for the current device). Clicks on this button and a device properties panel will show.

- **Profiles** - allows you to adjust the 6 audio effects to your current listening experience.

- **Gaming** - allows you to choose an audio profile to fit your gaming experience.

- **Multimedia** - allows you to choose an audio profile to fit your everyday experience.

- **Audio Effects** - allows you to separately control any of the 6 audio effects.

- **Bass Boost** - increases the energy in low frequencies up to +12 dB.

- **Virtual Surround**

- **Gaming and Movies** - virtualizes the multichannel audio stream and downmixes it in order to retrieve a multichannel listening experience over your stereo headphones or speakers.

- **Music** - expands the stereo for a wider sound stage.

- **Reverb** - increases the feeling of space by applying different types of reverbs corresponding to different room sizes.

- **Treble Enhancer** - Increases the energy in high frequencies up to +12 dB.
- **Smart Loudness** - maintains a constant volume for all elements of the audio experience to making them all sound softer, balanced or louder.
- **Voice Clarity** - boosts the speech in movies, video games and incoming communication from +0 through +12 dB (0 to 100%).
- **Reset Button** - restores the current profile to its default values.
- **On/Off Button** - allows you to turn on and off all Nahimic 2's effects in one click.
- **EQ Profile Page** - by clicking the arrow button, you can also access a second page that contains the x10 bands EQ and EQ profiles.

- **EQ Profiles** - allows you to choose between 6 EQ profiles to fit your audio experience
- **Custom EQ Profile** - you can change the x10 bands of the Custom EQ profile so as to make it fit your current needs.
- **x10 bands EQ** - x10 bands EQ, from 32Hz to 16KHz.

## Microphone Tab

From this tab, you can access all of Nahimic 2's microphone effects and settings.

• **Display & Volume** - displays the type of audio recording device currently being used as input, as well as its current volume.

- **Mute** - mutes the current device.
- **Device properties** - allows you to boost the volume and modify the left/ right balance of microphone. Clicks on this button and a device properties panel will show.

• **Microphone Loopback** - turns the microphone loopback On/Off. In order to avoid any feedback (Larsen effect).

• **Microphone Effects** - allows you to separately control any of the 3 microphone effects.

- **Voice Shaper** - applies a filter to the voice.
- **Voice Leveler** - levels the volume of your voice in order to avoid any saturation and maintains a constant and clear communication. Voice Leveler can be adjusted with a 0 to 100% slider.
- **Noise Reduction** - removes the remaining sound that the Noise Gate has left on top of your words and sentences.

## HD Audio Recorder 2

From this tab, you can access the audio launchpad and HD Audio Recorder 2 settings.

• **Audio Launchpad effects** - allows streamers to use prerecorded sounds during a livestream. These sounds can also be heard by viewers. This tool will allow you to create your true audio identity. That way, your livestreams will be more personal and animated. The Audio Launchpad is one of the fresh new features of Nahimic 2. As it's a feature designed for broadcasters, we included it in the HD Audio Recorder 2 page.

▪ **Pad Properties** - every pad can be customized by clicking the properties button that will appear in its bottom right when hovering over it with your mouse. On the Pad Properties panel you can choose:

- The sound assigned to each pad.
- The keyboard hotkey assigned to each pad.
- The color assigned to each pad.

▪ **Config 1, 2 & 3** - allows you to prepare 3 completely different configurations so as to adapt the Launchpad to the content you are streaming. Each configuration has 6 customizable pads. The 3 configurations are independent, meaning Config 1 cannot be used at the same time than Config 3.

- **Control Page** - by clicking the arrow button, you can access the control page.

- **Audio Launchpad ON/OFF** - switches the Audio Launchpad on or off.
- **HD Audio Recorder 2** - The HD Audio Recorder 2 is, by default, automatically launched when a XSplit Gamecaster 2 recording session is detected. The launch of the HD Audio Recorder 2 enables HD audio processing over an XSplit Gamecaster 2 recording without any need for adjustments. The HD Audio Recorder supports XSplit Gamecaster 2.
- **Pop-up message ON/OFF** - switches the pop-up message on or off.

## Sound Tracker

The Sound Tracker is an FPS oriented feature that provides a visual indication localizing the source of the strongest sound while in a game. The Sound Tracker captions the 5.1 and 7.1 sound streams processed by your audio system, and is displayed in all applications and games using DirectX 9, 9c, 10 and 11. Please remember Sound Tracker is only available if you are using an audio device that supports Nahimic 2 effects.

- **ON / OFF button and hotkey** - switches the Sound Tracker on or off.
- **Hotkey** - use the CTRL + SHIFT + S to turn ON / OFF the Sound Tracker.
- **7.1 Audio Test** - launch a 7.1 audio sample allowing you to preview how the radar will react in your game.
- **Transparency** - allows you to adjust the transparency of the Sound Tracker, making it look more or less discrete.
- **Scale** - allows you to adjust the scale of the Sound Tracker, making it look bigger or smaller.

## SteelSeries Engine 3

SteelSeries Engine 3 is a unified platform built to support all of SteelSeries products. It can deploy your saved device settings automatically when switching between your favorite games or applications.

After installation the SteelSeries Engine background processes will start and the interface will open automatically.

- **My Gear** - all of your SteelSeries devices in one place.
  - **Device Cards** - all of your SteelSeries devices are easily accessible from the My Gear tab, regardless of type, connection status, or which applications they are assigned to.
- **Library** - quickly set up your configurations to autolaunch with an application.
  - **Application Configuration** - you can choose to have configurations deploy automatically whenever you use a specific game or application. Add any number of applications to your library and SteelSeries Engine 3 will seamlessly change the configurations of your devices as you switch between them.

## Configuration Windows

Configuration Windows are unique to their devices and each of them includes a collapsible **Configuration List Panel** of all the configurations for that device. You can create a new configuration by selecting the **New** button at the bottom of the Configuration List Panel.

## Configuring Your Devices

You can custom configurations for SteelSeries devices in their Configuration Windows. The top left displays the name of the configuration you are viewing, the body features widgets for customizing various functions of the device, and at the bottom are Save/ Revert buttons, a Live Preview toggle, and a button to open/close the collapsible Configuration List Panel.

- **Widgets** - allow you to customize a certain aspect of your device.
- **Widgets Toggle** - allows you to toggle Widgets .
- **Configuration Windows Toggle** - allows you to toggle the Configuration Windows.
- **Live Preview** - gives you the full experience of your configuration's look, feel, and sound while you are editing it.
- **Revert/ Save Button** - configuration changes are not written to the database until you select **Save**. This gives you freedom to experiment, knowing that you can select **Revert** to undo changes.

### Tool Tip

When you click the question mark next to a feature name on the panel, a tooltip will show, describing the particular function of that item.

Question Mark

## CPU-Z

CPU-Z is an utility that gathers information on some of the main devices of your system.

- **CPU Tab** - shows processor name, code name, package, specification, instructions sets, core speed and cache levels.
- **Caches Tab** - shows extended information related to the cache capabilities.
- **Mainboard Tab** - shows motherboard manufacturer, model name, chipset, BIOS version and graphic interface.
- **Memory Tab** - shows memory type, memory size, channels, memory frequency.
- **SPD Tab** - shows specifications relating to each memory module connected to the motherboard, including the size, type and frequency.
- **Graphics Tab** - shows GPU name, code name, core speed, memory size, and memory type.
- **Bench Tab** - allows you to run either a benchmark or a stress test on your processor.
- **About Tab** - shows the CPU-Z version, Windows version, DirectX version and allows you to save the report file.

## TriDef VR

With TriDef VR you can play your favorite PC games on a huge 3D screen inside your virtual reality headset. It is compatible with the Oculus Rift and HTC Vive.

After installation, please ensure that your VR headset is set up and working correctly, then double-click **TriDef VR Games** on the Desktop, or from:

**Start > TriDef > TriDef VR Games**

You can now put on your VR headset to experience TriDef VR!

## VR Environment

With the headset on, you'll now find yourself inside a VR environment. Move your head around to change your view of the surroundings. A virtual screen will be visible in front of you. This screen will initially be showing the Windows desktop.

While TriDef VR is running, any Windows application you use will be shown on the virtual screen. Web browsers, games, media players, Windows Store apps, productivity apps, etc. can all be displayed on this 2D screen.

Use your mouse and keyboard as usual to control the applications. Audio will also be sent to your headphones.

## Main Window

The main TriDef VR application window controls various aspects of the VR experience. This window can be minimized if desired, but closing the window will exit TriDef VR. The Help menu provides a link to this user guide, our privacy policy and an about box.

## Games Tab

The first tab you'll see on the main window is the Games tab. As mentioned, apps or games launched from the desktop will appear in 2D on the virtual screen. However, if you launch a supported game from the Games tab, it will be displayed on the virtual screen in stereoscopic 3D!

The first time you launch TriDef VR, the application will scan your PC and automatically add supported games to the list. If a particular game wasn't found, or new games have been installed, then click the Add Game(s) tile:

Games can be removed from the list by right-clicking on the tile and selecting Remove. The Edit option in the right-click menu allows you to modify the game name and other properties.

## Settings Tab

The virtual screen's size, distance, curvature and background environment can be modified in the Settings tab.

## VR Controls

While in the VR environment, look down below the screen to see the Recenter and Settings items. As you look directly towards those items, a small white dot will appear. Aim this dot directly at an item to highlight it.

## Recenter

Look at the Recenter item for 1 second to enter recentering mode. Now look in the direction you would like the screen to appear. After a few seconds the screen will move to the new location.

## Settings Popup

Look at the Settings item for 1 second to display the Settings popup. This popup window appears in front of the virtual screen. Use your mouse to adjust the slider values.

- **Screen Settings** - adjust the virtual screen's size, distance and curvature.
- **Game Settings** - adjust 3D settings for that game. Please note that these settings are not available for applications and games launched from the desktop as those are displayed in 2D only.
- **Advanced Settings** - adjust the audio volume, game FPS and output quality. The **Audio** setting is only available when TriDef VR is redirecting the audio from a different output, so if the slider is disabled, then use the normal Windows volume controls instead. The **Game FPS** setting is provided for troubleshooting purposes only. The **Default** value should produce the best results. However, if a game appears to be stuttering on the virtual screen, then other options may fix this. **Output quality** determines how TriDef VR displays images on the virtual screen. The **Best** quality setting produces smoother images with more readable text characters. This is achieved by supersampling, which requires additional GPU resources. The **Better** option reduces the size of the supersampling process while Good renders the image without using supersampling.

## TriDef SmartCam

Use TriDef SmartCam to replace or SmartBlur your background in video chat applications or to remove your background in XSplit.

Just select TriDef SmartCam wherever you see a list of cameras or choose your webcam application. The following description uses XSplit Gamecaster for an example.

### TriDef SmartCam for XSplit Gamecaster

After installation TriDef SmartCam is integrated into XSplit Gamecaster version 2.5 and newer.

To enable TriDef SmartCam, launch Gamecaster as usual, and select the **Settings** tab.

Click the **BACKGROUND** option below the camera preview, then select **TriDef SmartCam** from the list.

You'll now see yourself in front of a black background. When you switch to your game, the black area will be transparent, so the game itself will be visible instead of your background!

### Options

When TriDef SmartCam is selected, several advanced settings are also made available.

TriDef SmartCam's background replacement can operate in one of two modes. In **Normal** mode, SmartCam will detect you and any movement in the background. Other people moving in the background will be included, as will your arms and other objects that are in motion. This may not be desirable in some circumstances, particularly in public settings.

For those occasions, **Head & Shoulders Only** mode would be more suitable. In this mode only you will be visible, specifically your face and upper torso. Arms usually won't be visible in this mode, and neither will objects or people behind you. Tick the Head & Shoulders Only checkbox to select this mode.

The **Quality** setting allows you to trade off image quality for processing speed. A higher quality setting will result in more accurate foreground detection, but requires more processing. This results in higher CPU usage which can reduce your game's frame rate.

# Troubleshooting

Before sending the motherboard for RMA repair, try to go over troubleshooting guide first to see if your got similar symptoms as mentioned below.

## The power is not on.

- Connect the AC power cord to an electrical outlet securely.
- Check if all ATX power connectors like **ATX\_PWR1**, **CPU\_PWR1**, **CPU\_PWR2** are connected from the power supply to the motherboard?
- Some power supply units have a power button on the rear side, make sure the button is turned on.
- Check if the power switch cable is connected to **JFP1** pin header properly.
- Verify the **Clear CMOS** jumper **JBAT1** is set to **Keep DATA**.
- Test with another known working power supply of equal or greater wattage.

## The power is on, but no signal to monitor

- Connect the monitor power cord to a electrical outlet securely.
- Make sure the monitor is turned on.
- Select different inputs on the monitor.
- If 3 long beeps are heard, remove all memory modules and try to install only one memory module in the **DIMMB2** slot first and then restart the computer.
- If 1 long 2 short beeps are heard, remove and reinstall the graphics card and then restart the computer.
- Test with another known working graphics card.

## The computer does not boot after updating the BIOS

- Clear the CMOS.
- Use the secondary BIOS to bootup the system (Only for motherboard with Dual BIOS)

## Lost BIOS password

- Clear the CMOS, but that will cause you to lose all customized settings in the BIOS.

## There is no audio

- Adjust the volume.
- Connect the speakers/headphones to audio ports on the motherboard rear IO panel.
- Remove secondary speakers/headphones, HDMI cables, USB audio devices.
- Test with another known working speaker or headphone.

## There is no network

- Make sure the network chipset driver has been installed.
- Verify if the network cable is properly connected and make sure the LAN port LEDs are properly illuminated.
- Verify your TCP/IP settings.
- Restart or reset your router.
- Test with another known working LAN cable.

## The USB device is not working

- Make sure your USB drive driver has been installed.
- Verify if USB device is listed in Windows® Device Manager.
- Connect the USB device to other USB port on the motherboard rear IO panel.

# Regulatory Notices

## FCC Compliance Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## WEEE (Waste Electrical and Electronic Equipment) Statement

ENGLISH

To protect the global environment and as an environmentalist, MSI must remind you that...

Under the European Union ("EU") Directive on Waste Electrical and Electronic Equipment, Directive 2002/96/EC, which takes effect on August 13, 2005, products of "electrical and electronic equipment" cannot

be discarded as municipal wastes anymore, and manufacturers of covered electronic equipment will be obligated to take back such products at the end of their useful life. MSI will comply with the product take back requirements at the end of life of MSI-branded products that are sold into the EU. You can return these products to local collection points.

#### DEUTSCH

Hinweis von MSI zur Erhaltung und Schutz unserer Umwelt

Gemäß der Richtlinie 2002/96/EG über Elektro- und Elektronik-Altgeräte dürfen Elektro- und Elektronik-Altgeräte nicht mehr als kommunale Abfälle entsorgt werden. MSI hat europaweit verschiedene Sammel- und Recyclingunternehmen beauftragt, die in die Europäische Union in Verkehr gebrachten Produkte, am Ende seines Lebenszyklus zurückzunehmen. Bitte entsorgen Sie dieses Produkt zum gegebenen Zeitpunkt ausschließlich an einer lokalen Altgerätesammelstelle in Ihrer Nähe.

#### FRANÇAIS

En tant qu'écologiste et afin de protéger l'environnement, MSI tient à rappeler ceci... Au sujet de la directive européenne (EU) relative aux déchets des équipements électriques et électroniques, directive 2002/96/EC, prenant effet le 13 août 2005, que les produits électriques et électroniques ne peuvent être déposés dans les décharges ou tout simplement mis à la poubelle. Les fabricants de ces équipements seront obligés de récupérer certains produits en fin de vie. MSI prendra en compte cette exigence relative au retour des produits en fin de vie au sein de la communauté européenne. Par conséquent vous pouvez retourner localement ces matériels dans les points de collecte.

#### РУССКИЙ

Компания MSI предпринимает активные действия по защите окружающей среды, поэтому напоминаем вам, что....

В соответствии с директивой Европейского Союза (ЕС) по предотвращению загрязнения окружающей среды использованным электрическим и электронным оборудованием (директива WEEE 2002/96/EC), вступающей в силу 13 августа 2005 года, изделия, относящиеся к электрическому и электронному оборудованию, не могут рассматриваться как бытовой мусор, поэтому производители вышеперечисленного электронного оборудования обязаны принимать его для переработки по окончании срока службы. MSI обязуется соблюдать требования по приему продукции, проданной под маркой MSI на территории ЕС, в переработку по окончании срока службы. Вы можете вернуть эти изделия в специализированные пункты приема.

#### ESPAÑOL

MSI como empresa comprometida con la protección del medio ambiente, recomienda: Bajo la directiva 2002/96/EC de la Unión Europea en materia de desechos y/o equipos electrónicos, con fecha de rigor desde el 13 de agosto de 2005, los productos clasificados como "eléctricos y equipos electrónicos" no pueden ser depositados en los contenedores habituales de su municipio, los fabricantes de equipos electrónicos, están obligados a hacerse cargo de dichos productos al término de su período de vida. MSI estará comprometido con los términos de recogida de sus productos vendidos en

la Unión Europea al final de su periodo de vida. Usted debe depositar estos productos en el punto limpio establecido por el ayuntamiento de su localidad o entregar a una empresa autorizada para la recogida de estos residuos.

#### NEDERLANDS

Om het milieu te beschermen, wil MSI u eraan herinneren dat....

De richtlijn van de Europese Unie (EU) met betrekking tot Vervuiling van Elektrische en Electronische producten (2002/96/EC), die op 13 Augustus 2005 in zal gaan kunnen niet meer beschouwd worden als vervuiling. Fabrikanten van dit soort producten worden verplicht om producten retour te nemen aan het eind van hun levenscyclus. MSI zal overeenkomstig de richtlijn handelen voor de producten die de merknaam MSI dragen en verkocht zijn in de EU. Deze goederen kunnen geretourneerd worden op lokale inzamelingspunten.

#### SRPSKI

Da bi zaštitili prirodnu sredinu, i kao preduzeće koje vodi računa o okolini i prirodnoj sredini, MSI mora da vas podesti da...

Po Direktivi Evropske unije ("UE") o odbačenoj elektronskoj i električnoj opremi, Direktiva 2002/96/EC, koja stupa na snagu od 13. Avgusta 2005, proizvođači koji spadaju pod "elektronsku i električnu opremu" ne mogu više biti odbačeni kao običan otpad i proizvođači ove opreme biće prinuđeni da uzmu natrag ove proizvode na kraju njihovog uobičajenog veka trajanja. MSI će poštovati zahtev o preuzimanju ovakvih proizvoda kojima je istekao vek trajanja, koji imaju MSI oznaku i koji su prodati u EU. Ove proizvode možete vratiti na lokalnim mestima za prikupljanje.

#### POLSKI

Aby chronić nasze środowisko naturalne oraz jako firma dbająca o ekologię, MSI przypomina, że... Zgodnie z Dyrektywą Unii Europejskiej ("UE") dotyczącą odpadów produktów elektrycznych i elektronicznych (Dyrektywa 2002/96/EC), która wchodzi w życie 13 sierpnia 2005, tzw. "produkty oraz wyposażenie elektryczne i elektroniczne" nie mogą być traktowane jako śmieci komunalne, tak więc producenci tych produktów będą zobowiązani do odbierania ich w momencie gdy produkt jest wycofywany z użycia. MSI wypełni wymagania UE, przyjmując produkty (sprzedawane na terenie Unii Europejskiej) wycofywane z użycia. Produkty MSI będzie można zwracać w wyznaczonych punktach zbiorczych.

#### TÜRKÇE

Çevreci özelliğiyle bilinen MSI dünyada çevreyi korumak için titrlatır: Avrupa Birliği (AB) Kararnamesi Elektrik ve Elektronik Malzeme Atığı, 2002/96/EC Kararnamesi altında 13 Ağustos 2005 tarihinden itibaren geçerli olmak üzere, elektrikli ve elektronik malzemeler diğer atıklar gibi çöpe atılmayacak ve bu elektronik cihazların üreticileri, cihazların kullanım süreleri bittikten sonra ürünleri geri toplamakla yükümlü olacaktır. Avrupa Birliği'ne satılan MSI markalı ürünlerin kullanım süreleri bittiğinde MSI ürünlerin geri alınması isteği ile işbirliği içerisinde olacaktır. Ürünlerinizi yerel toplama noktalarına bırakabilirsiniz.

#### ČESKY

Záleží nám na ochraně životního prostředí - společnost MSI upozorňuje...

Podle směrnice Evropské unie ("UE") o likvidaci elektrických a elektronických výrobků 2002/96/

EC platné od 13. srpna 2005 je zakázáno likvidovat "elektrické a elektronické výrobky" v běžném komunálním odpadu a výrobci elektronických výrobků, na které se tato směrnice vztahuje, budou povinni odebrat takové výrobky zpět po skončení jejich životnosti. Společnost MSI splní požadavky na odebrání výrobků značky MSI, prodávaných v zemích EU, po skončení jejich životnosti. Tyto výrobky můžete odevzdat v místních sběrnách.

#### MAGYAR

Annak érdekében, hogy környezetünket megvédjük, illetve környezetvédeként fellépve az MSI emlékezteti Önt, hogy ...

Az Európai Unió („EU”) 2005. augusztus 13-án hatályba lépett, az elektromos és elektronikus berendezések hulladékaikról szóló 2002/96/EK irányelve szerint az elektromos és elektronikus berendezések többé nem kezelhetők lakossági hulladékként, és az ilyen elektronikus berendezések gyártói kötelesek válnak az ilyen termékek visszavételére azok hasznos élettartama végén. Az MSI betartja a termék visszavételével kapcsolatos követelményeket az MSI márkánév alatt az EU-n belül értékesített termékek esetében, azok élettartamának végén. Az ilyen termékeket a legközelebbi gyűjtőhelyre viheti.

#### ITALIANO

Per proteggere l'ambiente, MSI, da sempre amica della natura, ti ricorda che...

In base alla Direttiva dell'Unione Europea (EU) sullo Smtaltimento dei Materiali Elettrici ed Elettronici, Direttiva 2002/96/EC in vigore dal 13 Agosto 2005, prodotti appartenenti alla categoria dei Materiali Elettrici ed Elettronici non possono più essere eliminati come rifiuti municipali: i produttori di detti materiali saranno obbligati a ritirare ogni prodotto alla fine del suo ciclo di vita. MSI si adegnerà a tale Direttiva ritirando tutti i prodotti marchiati MSI che sono stati venduti all'interno dell'Unione Europea alla fine del loro ciclo di vita. È possibile portare i prodotti nel più vicino punto di raccolta

## Wireless Radio Use

This device is restricted to indoor use when operating in the 2.4GHz, 5GHz frequency band.

Cet appareil doit être utilisé à l'intérieur.

당해 무선설비는 운용중 전파혼신 가능성이 있음.

この製品は、周波数帯域 2.4GHz, 5GHz で動作しているときは、屋内においてのみ使用可能です。

### NCC無線設備警告聲明

工作頻率 2.4GHz, 5GHz 該频段限於室內使用。經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

### Products with radio functionality (EMF)

This product incorporates a radio transmitting and receiving device. For computers in normal use, a separation distance of 20 cm ensures that radio frequency exposure levels comply with EU requirements. Products designed to be operated at closer proximities, such as tablet computers, comply with applicable EU requirements in typical operating positions. Products can be operated without maintaining a separation distance unless otherwise indicated in instructions specific to the product.

### Restrictions for products with radio functionality

 CAUTION: IEEE 802.11x wireless LAN with 5.15–5.35 GHz frequency band is restricted for indoor use only in all European Union member states, EFTA (Iceland, Norway, Liechtenstein), and most other European countries (e.g., Switzerland, Turkey, Republic of Serbia). Using this WLAN application outdoors might lead to interference issues with existing radio services.

### Radio frequency bands and maximum power levels

Features	:802.11 a/b/g/n/ac, BT
Frequency Range	:2.4GHz, 5GHz
Modulation	:FHSS, DSSS, OFDM
Power Output	:10, 20, 23

## 产品中有害物质的名称及含量

部件名称	有害物质					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴联苯 (PBB)	多溴二苯醚 (PBDE)
印刷电路板组件*	×	○	○	○	○	○
电池** 	×	○	○	○	○	○
外部信号连接头	×	○	○	○	○	○
线材	×	○	○	○	○	○

本表格依据 SJ/T 11364 的规定编制。

○: 表示该有害物质在该部件所有均质材料中的含量均在 GB/T 26572 规定的限量要求以下。

×: 表示该有害物质至少在该部件的某一均质材料中的含量超出 GB/T 26572 规定的限量要求,但所有部件都符合欧盟RoHS要求。

\* 印刷电路板组件: 包括印刷电路板及其构成的零部件。

\*\* 电池本体上如有环保使用期限标识,以本体标识为主。

■ 上述有毒有害物质或元素清单会依型号之部件差异而有所增减。

■ 产品部件本体上如有环保使用期限标识,以本体标识为主。

## 限用物質含有情況標示聲明書

單元	限用物質及其化學符號					
	鉛 (Pb)	汞 (Hg)	鎘 (Cd)	六價鉻 (Cr <sup>VI</sup> )	多溴聯苯 (PBB)	多溴二苯醚 (PBDE)
電路板	○	○	○	○	○	○
電子元件	—	○	○	○	○	○
金屬機構件	—	○	○	○	○	○
塑膠機構件	○	○	○	○	○	○

備考1. “超出0.1 wt %”及“超出0.01 wt %”係指限用物質之百分比含量超出百分比含量基準值。

備考2. “○”係指該項限用物質之百分比含量未超出百分比含量基準值。

備考3. “—”係指該項限用物質為排除項目。
